A View Looking East Over Fruitland Nurseries

HIS is YOUR nursery guide. Your patronage, criticism and interest, as well as that of your grandparents, have made possible our 79 years of service in furnishing quality nursery stock.

FRUITLAND'S LANDSCAPE DIVISION. Our Landscape Planning and Planting Service is in charge of experienced men. This most complete service is yours also.

**PLANNING.** We are prepared to design the area which you wish to develop, regardless of the size, whether the home lot, church, school, estate or park.

**PLANTING.** Our charges for this phase is most reasonable, as only trained men are used who execute expeditiously all planting.

MAINTENANCE. Relieve yourself of the responsibility of caring for your grounds. FRUITLAND will care for your grounds full time, or while you are away through the summer. Perhaps you have a gardener whom you would like advised regarding spraying, etc. We have been very successful in pleasing our clients with this much-needed service. We should be glad to give you further information relative to this.

TREE SURGERY. Trees are one of your most beautiful and valuable assets to the home grounds, and should be given every attention. FRUITLAND'S tree surgeons are expert in their line and have had wide experience.

PRUNING, SPRAYING AND LAWN PLANTING. These necessary aids to the beauty of your grounds are attended to economically by us. Fashions change

—even in landscape design. We strive for new ideals in beauty. New plants are introduced. Be modern—have FRUITLAND increase your property values by making your grounds more attractive. Our charges are really most reasonable, considering our service.

FRUITLAND'S 250-ACRE NURSERIES are situated where there is a diversity of soils, making it possible for us to grow such a varied collection of beautiful plants and trees. From the propagating department, where hundreds of thousands of plants are started, to the final transplanting field, all plants are given every attention to help make them healthier and more beautiful, for these are your plants and we know that you do not want us to spare any expense to make them the pride of your grounds.

WHEN ORDERING, use names as given in catalog, using the convenient order blank in this catalog. Do not forget to fill in your name and address, with shipping instructions. We are most careful in filling your orders, but you know to err is human, and when we make a mistake let us know at once and we shall make adjustments satisfactory to you. We, of course, cannot be responsible for loss of plants from sources beyond our control, such as lack of attention on buyer's part during spells of unfavorable weather. Report of loss of plants must be made within two weeks of receipt of shipment.

TERMS. Our terms are cash, unless otherwise arranged in advance. On all C. O. D. orders we require a 25 per cent deposit in advance.

WE HAVE NO AGENTS.

# Spring and Summer

# Blooming Bulbs

### **GLADIOLUS**

The Most Satisfactory Cut Flowers

### Fruitland Mixture of Largeflowering Gladiolus

A splendid mixture of fine varieties. In it you will find a rich combination of bright-colored flowers.

Delivery in January. 40c doz.; \$2.50 per 100.

### **DAFFODILS**

\$1.50 per doz.; \$8.00 per 100. Emperor. Large yellow blooms. Empress. Trumpet yellow; perianth white.

### **HYACINTHS**

\$1.75 per doz. \$12.00 per 100. Gertrude. Brilliant pink. Grand Maitre. Bright porcelain-blue. L'Innocence. Pure white. Roi des Belges. Deep red.

### JONQUILS

Campernelle rugulosus. Single; yellow; very fragrant. Larger than the plain Campernelle. \$1 per doz.; \$7.50 per 100.

### **NARCISSUS**

Paper White. Large, healthy, clean bulbs. 35c per doz. \$2.50 per 100.

### NERINE SARNIENSIS

Guernsy Lily. \$1.00 per doz.; \$7.50 per 100.

### SNOWDROPS

Too well known to need description. 75c per doz. \$5.00 per 100.

### DARWIN TULIPS

75c per doz.; \$5.00 per 100, except where otherwise noted.
Bartigon. Fiery red.
Clara Butt. Salmon-pink.
Farncombe Sanders. Bright scarlet.
Inglescombe Yellow. Yellow.
Pride of Haarlem. Rosy carmine.
Princess Elizabeth. Deep rose-pink.
Rev. H. Ewbank. Light Heliotrope.
William Copeland. Delicate lavender.
Mixed. 60c per doz.; \$4.00 per 100.

### ZEPHYRANTHES **ATAMASCO**

Zephyr or Fairy Lily. 35c per doz.; \$2.50 per 100.

# FRUITLAND'S RELIABLE FLOWER SEEDS

FOR the convenience of our friends the new Flower Seed Section has been added to our Catalog. It is a new venture, but we believe you will like to get flower seeds and plants at the same place. Using one order sheet, one envelope, and one 3-cent stamp is much easier and cheaper than writing to three or four different firms. The seeds come from the most noted American growers, are true to name, and of the same high quality as Fruitland plants and trees. Send us your flower-seed orders. If what you want is not listed here, we will endeavor to get it for you.

### AGERATUM . Floss Flower

Blue Ball. Compact round plants, 6 to 8 in. tall. Pure blue flowers. Pkt., 15c; ½ oz., 30c.

### ANTIRRHINUM MAXIMUM

### Giant Snapdragons

Canary Bird. Gigantic; canary yellow.
Fordhook Rose. Blending shades of rose-pink and yellow.
Orchid. Bright mauve-pink with deeper colored tube.
Ruby. Solid ruby-red. Decidedly striking.
Sunnybrook. Combines rich shades of deep golden-yellow, salmon and orange.
Wallflower. Rich, deep coppery crimson.
PRICES of above: Pkt., 15c. 1/16 oz., 40c.
Tall Giant-Flowered Mixed. A splendid mixture of all tall-growing giant varieties. Pkt., 15c. 1/16 oz., 35c.

### AQUILEGIA . Columbine

Long-spurred, Blue Shades. Long-spurred, Pink Shades.
Long-spurred, Lemon Queen.
PRICES of above: Pkt., 25c. 1/16 oz., 60c.
Long-spurred Hybrids: Pkt., 15c. ½ oz., 50c.

### **ASTERS**

California Giant Sunshine. Anemone-Flowered. Mixed colors, tall and bloom in mid-season. Pkt., 15c. ½ oz., 35c. Crego. Wilt-resistant strain. Mixed colors. Pkt., 20c. ½ oz., 50c.

CALENDULA . Scotch Marigold
Golden Ball (Ball's Gold). Deep yellow. Pkt., 20c. 1/4 oz., 60c.

Orange Ball (Ball's Orange). Orange blooms of great size.
Free flowering. Pkt., 20c. ¼ oz., 60c.

Radio. Rich shade of clear orange. Petals attractively quilled. Pkt., 15c. ¼ oz., 40c.

Sunshine. Chrysanthemum-Flowered. An entirely new species. Grows 2 to 2½ ft. tall; large bright yellow flowers. Especially fine. Pkt., 10c. ¼ oz., 35c.

### CARNATION . Chabaud's Giant Improved

Mixed. Pkt., 15c. 1/8 oz., 50c.

### COSMOS

Klondike. Single orange colored flowers; tall; fall bloomer. Pkt., 10c. 1/4 oz., 20c.

### DAHLIA

Pompon. Mixed. Small ball-shaped flowers, excellent for garden display. Good variety of colors. Pkt., 20c. 1/16 oz., 55c.

Unwin's Dwarf Hybrids. A new dwarf early-flowering semi-double strain of Dahlia in a wide range of colors. Grows 2 ft. tall. Easily grown from seed. Flowers first year from seed. Pkt., 35c.

### DELPHINIUM . Hardy Larkspur

Belladonna, Improved. Turquoise-blue, single flowers. Pkt., 20c. 1/16 oz., 40c.
Belladonna Seedlings. Large, single flowers, varying through all shades of blue, on 3-foot spikes. Pkt., 20c.

1/16 oz., 40c. Choice Mixed, Gold Medal. Pkt., 15c. ½ oz., 40c.

### DIANTHUS . Hardy Garden Pinks

Dianthus Winterl. Large, single, fragrant flowers; mixed colors. If seed are sown early, blooms can be obtained the first year. Pkt., 35c. 1/16 oz., 60c.

### ESCHSCHOLTZIA . California Poppy

Aurantlaca. Deep golden yellow. Pkt., 10c. 1/4 oz., 25c.

### GAILLARDIA . Blanket Flower

Double, Yellow. Pkt., 15c. 1/4 oz., 45c.

Indian Chief. Single; metallic red petals, surrounding mahogany-brown center. Large and free flowering. Pkt., 10c. 4 oz., 40c.

### GOURDS

Ornamental Gourds. Fine Mixed. Many sorts. Pkt., 10c. ½ oz., 20c.

### HELIOTROPE

Giant Hybrids, Mixed. Fragrant flowers ranging in colors from pure white to violet-blue. Pkt., 15c. 1/8 oz., 50c.

### HOLLYHOCKS

Double, Crimson. Pkt., 10c. 1/8 oz., 35c. Double, Newport Pink. Pkt., 10c. 1/8 oz., 35c. Double, Mixed Colors. Pkt., 10c. 1/8 oz., 30c.

### IBERIS . Annual Candytuft

Pkt., 10e. 1/4 oz., 25e.

Umbellata, Carmine. Umbellata. Rose-Cardinal. Umbellata, Lilae. Umbellata, White.

Mixed Colors: Pkt., 10c. 1/2 oz., 25c.

### IMPATIENS . Sultan's Balsam

Holstii Hybrids. Includes white, flesh-pink, pink, rose, salmon, orange, carmine, crimson, and violet shades. Give sunny or semi-shaded situation. Plants grow 1 to 2 feet tall. Pkt., 20c. 1/32 oz., 85c.

### ANNUAL LARKSPUR

Tall: double-flowering. Grows 31/2 feet high.

Sky-blue. Pkt., 10c. 1/4 oz., 30c.

Carmine (Newport Pink). Pkt., 10c. 1/4 oz., 30c.

Carmine King. Giant Imperial or Upright Delphinium form. Color double deep carmine-rose flowers. Plants 4 to 5 ft. tall; flower-spikes 3 to 4 ft long. Pkt., 25c. ¼ oz., 50c. Rose. Pkt., 10c. 1/4 oz., 30c.

Mixed Colors. Pkt., 10c. 1/4 oz., 25c.

### MARIGOLD . Dwarf French Double

Gold-striped. Pkt., 10c. 1/4 oz., 30c.

Orange Ball. Pkt., 10c. 1/4 oz., 30c.

Mixed. Pkt., 10c. 1/4 oz., 25c.

Dwarf Mexican Orange. A new variety with immense double flowers 3½ to 4 in. across. Color golden orange. Pkt., 25c. ½ oz., 60c.

### NASTURTIUMS

Double Hybrids. Fragrant double flowers. Mixed colors. Offered for the first time this year. Pkt., 25c.

Dwarf. Mixed colors. Pkt., 10c. Oz., 25c.

olden Gleam. Large, double, sweet-scented blooms. Long stems. Pkt., 10c. ½ oz., 25c. yellow

Petunias

### PETUNIAS

#### BEDDING

Rosy Morn. Soft rose-pink with broad white throat. Profuse bloomer. Pkt., 15c. 1/16 oz., 45c.

Enchantress Mixture. Includes full range of colors. Excellent for beds and borders. Pkt., 10c. 1/8 oz., 50c.

### BALCONY

Blue. Pkt., 15c. 1/32 oz., 40c.

Rose. Pkt., 15c. 1/32 oz., 40c.

Star of California. Velvety violet, shaded crimson, with pure white blotches. Pkt., 15c. 1/32 oz., 40c.

### GIANT-FLOWERED

Elk's Purple or Pride. Large, rich deep purple with velvety black veins. Pkt., 25c.

Fluffy Ruffies. Large flowers, fringed and ruffled on edges. Includes wide range of colors. Very showy. Very showy. edges. In Pkt., 35c.

Ruffled Pink. Rich, pure pink with fringed and ruffled edges. Charming. Pkt., 25c.

### PHLOX DRUMMONDI GRANDIFLORA

#### ANNUAL PHLOX

Pkt., 10c. 1/8 oz., 30c.

Apricot. Bright yellow with white eye. Fordhook Crimson. Rich crimson. Large. Splendens. Red with white eye.

### POPPIES, ANNUAL

Peony-flowered, Double, Mixed. Pkt., 10c. ¼ oz., 20c. Shirley Improved, Single, Mixed. Pkt., 10c. ¼ oz., 25c. Shirley, Double Hybrids, Mixed. Pkt., 10c. 1/4 oz., 25c.

### PORTULACA—Sun Plant

Portulaea. Rose Moss—Sun Plant. Compact, spreading plants, 8 in. tall. This mixture contains many bright colors. Single. Pkt., 10c. ½ oz., 50c.

### SALVIA . Scarlet Sage

Bonfire (Clara Bedman). Scarlet flowers. Grows 2 feet tall. For bedding and bordering. Pkt., 10c. 1/8 oz., 50c. Splendens. Red spikes, 3 to 4 feet tall. Pkt., 10c. 1/8 oz., 40c.

### STOCKS

Pkt., 10c. 1/8 oz., 55c.

Dwarf Large-flowering. Light Blue. Bright Pink. Blood-Red.

### SWEET PEAS

Mixed. Large-flowering; assorted colors. Pkt., 10c. Oz., 20c.

### SWEET WILLIAM . Dianthus

Double, Mlxed. Pkt., 10c. ½ oz., 40c. Annual, Mlxed. Pkt., 10c. ¼ oz., 35c.

### TITHONIA . Mexican Sunflower

Speciosa. Stately plants growing about 10 ft. tall, carrying a great quantity of brilliant orange-scarlet blooms, 3 to 4 in. in diameter. Good for background and for cutting. Blooms profusely in late summer and fall. Pkt., 25c. 1/8 oz., 45c.

VINCA—Periwinkle (Annual)

inca. Periwinkle. Dark, glossy, green leaves; 12-18 in. tall, for beds or borders. Colors, pink and white mixed. Pkt., 10c. 1/4 oz., 35c.

### ZINNIA

DOUBLE LILLIPUT (Dwarf-1 ft.). Pkt., 10c. 1/4 oz., 35c. Canary-Yellow.

Crimson Gem.
Salmon-Rose.
Mixed. Pkt., 10c. ¼ oz., 30c.

GIANT DOUBLE DAHLIA-FLOWERED

Buttercup. Large yellow flowers.

Dream. Deep lavender.

Old-Rose. Good shade of warm, old-rose. Pkt.. 15c.

1/8 oz., 40c.

Glant Dahlia-flowered Mixed. Pkt., 15c. 1/8 oz., 30c.

Glant Cactus—Flowered. Mixed colors. Large, attractive flowers, 3 to 4 in. across, with petals partially quilled, giving the flower somewhat the appearance of a Cactus Dahlia. Plants grow 3 ft. tall. Pkt., 15c. 1/8 oz., 35c.

Curled and Crested. Mixed colors. Oddly formed; double blooms, about 3½ in. across, with twisted, curled, and crested petals. Plants grow 2 ft. tall. Many unusual colors in mixture. Pkt., 10c. ¼ oz., 30c.

Fantasy Mixture. A.A.S. Award of Merit, 1935. Has rounded flowers, composed of a mass of shaggy, ray-like petals, which give a delicate and refined appearance to the medium-sized double flowers. Wide color range; very graceful; superior to Quilled type. Pkt., 25c; ½ oz., 50c.

Everyone is familiar with the old time Winter Honey-suckie or Matrimony (Lonicera fragrantissima), which has a most pleasing fragrance when in blossom in the heart of winter.

The Chinese Wintersweet (Meratia praecox) is not so well known, but is a delightful plant to have, as it gives flowers about the same time as the Winter Honeysuckle.

By all means plant a Tea Olive or two near your living room windows, as there is no plant that has such delightful fragrance. It blooms in all but the very coldest and hottest part of the year—especially in the early spring and the early fall.

To leave from the coldest part of the year to the very hottest part of the year when flowers are so very scarce, why not plant a few of the extremely floriferous Lantana, which will bloom regardless of the summer sun.

The old time Aithaea (Hibiscus syriacus) is another dryweather stand-by. The Autumn Sage is not as well known as it might be, but given a sunny, well-drained location it will give a mass of color in late summer and early fall.

There are many handsome berried plants which are satisfactory and are highly ornamental. All of the Holies (Ilex) are considered the stand-by for Christmas decoration, but the Evergreen Burning Bush (Euonymus japonicus), Nandinas and Leatherleaf Holly-Grape (Mahonia bealei), and the Pyracanthas should not be omitted when planting berried plants. planting berried plants.

You will find all of these plants listed throughout Fruitland's catalog.

## FRUITLAND LAWN SEED

In the South the best period for lawn-making is from September to December—the earlier the better. Do not attempt to make a lawn during very dry or extremely windy weather. In preparing the soil it should be plowed as deeply as possible and then subsoiled, harrowed, and all stones removed. If plowing is not practical, have the ground spaded carefully and thoroughly. To feed the grass, use sheep-manure at the rate of 1,000 pounds to the acre, or bonemeal at the rate of 800 pounds to the acre. Work this food well into the soil, level the ground, and rake perfectly smooth. Broadcast the seed at the rate of 60 to 75 pounds to the acre (210 by 210 feet), rake lightly, cover the seed, and then roll. If you cannot get a roller, firm the soil with a plank or flat tamper. During hot, dry weather use a lawn-sprinkler or spray-nozzle after sunset—do not spray when the sun is shining, nor apply the water with great force. During prolonged dry spells, water each evening. Established lawns may be lightly reseeded each autumn, covering the bare spots and insuring a substantial turf.

### Fruitland Mixture of Special Grasses for Southern Landscapes

After years of testing we have decided that the Fruitland Grass Mixture will give the most satisfactory results for Southern lawns. It is composed of grasses that have the greatest heat- and drought-resisting qualities. The varieties are carefully blended to give a mixture that will withstand hot weather better than any evergreen lawn grass that we have been able to obtain. Of course, during periods of intense heat and drought, all evergreen lawn

grass will burn more or less. All of the seed used in Fruitland Mixture has been recleaned, is strictly free from weeds, and is of high germination.

# FLOWERING SHRUBS

### from Fruitland Nurseries

LOWERING Shrubs give the finishing touch so much required by small and large home-grounds. When properly arranged, shrubs will soften the lines of the foundation, will provide an effective border or screen, will cover the edges of walls and screen objectionable views. Shrubs may also be used for covering slopes and for dividing the landscape into small sections, and for bordering the outdoor living-room of small homes. A selection of varieties will give a succession of flowers from spring until late autumn and after the foliage has fallen the brilliant berries and branches add color and cheer to the winter landscape.

All of these advantages and many more will come from a proper selection of Flowering Shrubs, and a small investment will pay for itself many times over by increasing the value of your property

and your satisfaction in ownership.

The figure after each variety denotes ultimate height of plant. ALTHAEA frutex. See Hibiscus syriacus.

### AZALEA

When planting Azaleas, soil from the woods should be used, and plants mulched with half-rotted leaves, thus reproducing, as nearly as possible, their native environment.

Azalea calendulacea (Great Fiame Azaiea). 6 to 10 ft. One of the many beautiful native flowering plants which grows throughout the eastern states. The blossoms appear in April, in clusters, and are of various colors—yellow, orange, buff and various shades of red. We offer a variety of colors, but plants are not separated as to color.

Azalea nudiflora (Pinxterbloom; Wood Honeysuckle). 6 to 10 ft. The well-known native variety which produces fragrant, pinkish white blossoms in April before the leaves appear.

#### FORSYTHIA Golden Bell

Splendid old shrub with bright yellow, bell-shaped flowers which appear in the spring before the leaves come out. Sometimes the Forsythia is confused with the winter jasmine. The upright forms make excellent hedges, and good fillers for massed shrubs.

Forsythia intermedia (Border Forsythia). 6 to 8 ft. A tall variety with slender, arching branches. Flowers golden yellow, produced in great profusion. Blooms in March.

### F. intermedia spectabilis. 6 to 8 ft. The most beautiful of the Golden Bells. Profusion of large bright yellow flowers in March.

F. suspensa (Weeping Forsythia). 6 to 8 ft. A graceful variety with long, slender drooping branches. Leaves dark, shining green. Flowers yellow, produced in great profusion in March.

F. suspensa fortunei (Fortune Forsythia). 6 to 8 ft. Similar to F. suspensa, but habit is more upright and vigorous. Flowers golden yellow, frequently with twisted petals. A desirable variety. Blooms in March.

F. viridissima (Greenstem Forsythia). 6 to 8 ft. Flowers golden yellow, produced in great profusion last of February or early in March. Most effective when planted in large groups.

### HYPERICUM . Gold Flower

Hypericum moserianum. 2 ft. A beautiful dwarf shrub; in this section almost an evergreen. Leaves dark green. Large, single, bright golden yellow flowers 2 inches in diameter. A very desirable plant. Blooms from early May throughout the entire summer and most effective when planted \$4.50

### JASMINUM . Jasmine

Jasminum floridum (Flowery Jasmine). 3 ft. From China. Golden yellow flowers, half an inch in diameter, produced during summer. Hardy as far north as Washington. Flexuous branches and very pretty foliage.

J. humile (Italian Jasmine). 20 ft. Almost evergreen; hardy to Maryland. Erect shrub-like growth; yellow flowers in clusters, produced from April until fall. Native to Asia.

J. nudiflorum (Winter Jasmine). 10 ft. A very graceful, hardy, drooping shrub with dark green bark which gives the plant the appearance of being evergreen. Leaves dark green. Bright yellow flowers freely produced in early January and continuing for some time. Hardy at New York. Native to China.

### Kerrla

### A New Hardy Pink **Jasmine**

J. stephanense. Semiclimbing hybrid, hardy to Philadelphia. Fragrant, pale pink flowers, produced in clusters in late April.

Above Jasminums: 2 to 3 ft., very heavy.\$.60 \$5.00 18 to 24 in., well 

### KERRIA . Globe Flower

Kerria Japonica flore-plena (Corchorus japonicus). 6 ft. An old favorite. It is of spreading habit, with double yellow blooms about an inch in diameter, which appear early in April. Effective for massing.

\$5.00 3.50

### KOLKWITZIA . Beauty Bush

Kolkwitzia amabills. 6 ft. A charming new shrub from China. It is hardy in the New England States. Has general resemblance to wiegela and honeysuckle, the beautiful trumpet-shaped flowers appearing in abundance in April. Flowers pale pink, with orange veins in throat; buds darker. 

Lagerstroemia

LAGERSTROEMIA Crape Myrtle

Crape Myrtle

Crape Myrtles will sometimes remain dormant, not putting out leaves for a year. They should be cut back, kept watered and the ground around them loosened lightly. If Crape Myrtles are severely pruned and well fertilized in February, the blossoms during that season will be much more beautiful. During wet scasons these plants are attacked by a discase which turns the foliage black. Two sprayings will usually control this, one as soon as it is noticed on plants; another two wecks later. Use one-half pound Fungi-Bordo and 6 teaspoonfuls Black-Leaf 40 to each 3 gallons of water. of water.

of water.

Lagerstroemia indica (Crape Myrtle). 20 ft. A popular and free-flowering shrub, or small tree, which produces blooms in great abundance throughout the summer. The flowers are beautifully fringed and are borne in large clumps. A massing of these, or a single specimen, makes a most striking effect. Commences to bloom in June. All plants will be pruned before shipping. First year blooms not always true. Crimson and white, 18 to 24 in., 2 to 3 ft., 3 to 4 ft. Pink, 4 to 5 ft. and 5 to 7 ft. only. Specimens in crimson and pink only.

### STEPHANANDRA

Stephanandra flexuosa (Cutlcaf Stephanandra). 8 ft. A very graceful and desirable shrub from Japan and Korea, with spreading, drooping branches. Leaves serrated. White flowers in soft feathery racemes are produced in May. 2 to 3 ft. .....\$ .35

### STEWARTIA

Stewartia monadelpha (Japanese Stewartia). In Japan growing to 80 ft. In cultivation perhaps a tall shrub. Large, single, white flowers with violet anthers in late spring. 3 to 4 ft.

SYMPHORICARPOS. Snowberry (St. Peter's Wort)
Symphoricarpos chenaulti. 3 ft. The most desirable Snowberry.
Graceful; compact; small foliage. Bears fruit of white to pink color. Of hybrid origin.

S. racemosus (Common Snowberry). A very graceful shrub, growing 4 to 6 ft. tall, with slender drooping branches. Flowers white, followed by clusters of white berries which remain upon the plant for months. A native to North America.

S. vulgaris (Coralberry). 4 ft. A native shrub growing naturally from New York to Texas. Purplish red berries, produced in great profusion, remain upon the plant all winter, making it especially desirable for landscape planting.

All Symphoricarpos:

Syringa persica laciniata (Cutleaf Persian Lilac). 6 ft. Foliage finely cut. Light purple blossoms in April have the customary lilac odor. Not attacked by diseases or insects.

S. vulgaris (Common Lilac). 20 ft. The well-known European variety so often seen at old homes.

# Fruitland Grown Trees for Shade and Flower

"I Think I Shall Never See a Poem as Lovely as a Tree"

PRUITLAND NURSERIES, realizing that here in the South it is almost imperative that we have shade trees, grows an unusually large variety. Certain of these varieties will not grow tall enough for much shade, their merits being beautiful foliage, as in the Red Leaf Maple; lovely flowers in the Dogwoods; tall screens or accents with the Lombardy Poplars. With FRUITLAND trees you may have wonderful shade; magnificent flowers; glorious autumn coloring in foliage and fruit, and the grotesque with certain weeping trees.

The figures after each name denote ultimate height of plant.

Acacia (Mimosa). See Albizzia.

### ACER . Maple

Acer palmatum atropurpureum (Japanese Red-Leaf Maple). 25 ft. Foliage and shoots colored bronzy-red. Should be planted in a moist position where it will not receive the hot afternoon sun. Rather a shrub in the South. Each 18 to 24 in. \$3.00 15 to 18 in. 2.00

### ALBIZZIA . Mimosa

Albizzia julibrissin (Acacia julibrissin: Silk Tree). 20 ft. A rapid-growing tree with spreading branches and a low, flat-topped head. Foliage fine and feathery. The large heads of pink flowers are borne at tips of branches the middle of May and continue for several wecks. A native to Persia and Japan, but naturalized in the South.

4 to 5 ft.		40	3.00	
3 to 4 ft		25	2.00	

### ALEURITES . Tung-oil Tree

Aleurites fordi. 30 ft. A medium-sized tree indigenous to central China. The rather large, apricot white nowers. which appear in large numbers in April, with the broad, handsome, green leaves following, make the tree a valuable ornamental. It thrives best in well-drained and sand-clay loams. The tree is reported to live to the age of thirty years or more. Its apple-like fruits contain several large nut-like seeds which yield the valuable tung-oil or China wood oil of commerce, used extensively in paints and varnishes.

### FRUITLAND GROWN TREES ARE BETTER

It pays to plant our nursery-grown trees instead of trees dug up in the woods. Our trees have well-developed tops and roots. They look well and grow well, which cannot be said of the spindling forest seedlings.

### AMYGDALUS . Flowering Peach

During March the Flowering Peaches are covered with a mass of beautifully formed and highly colored, double flowers. These trees cannot be too highly recommended for early spring blooming. Perfectly hardy, thriving in any soil in which other Peaches grow.

Amygdalus persica albo-plena. 12 ft. White;

A. persica carnea flore-plena. 12 ft. Pink; double.

A. persica rubro-plena. 12 ft. Red; double.
All Amygdalus: Each 10

1-yr., 4 to 5 ft., extra heavy ....\$ .85 \$8.00 1-yr., 3 to 4 ft., well branched. .65 6.00

### CERCIS . American Redbud

Cercis canadensis. 30 ft. A fast-growing, round-headed tree with large, leathery, heart-shaped leaves. The last of March, before the foliage appears, the tree is covered with a profusion of delicate reddish purple flowers.

 $\frac{10.00}{6.50}$ 

### KOELREUTERIA . Golden Rain Tree

Koeireuteria paniculata. 25 ft. An ornamental shade tree from China. The leaves are broad and flat, coarsely toothed on the edges, and carried in flat heads. When the foliage first opens in spring it is dull red, later turning to dark green. The latter part of May large clusters of yellow flowers are produced for about three weeks—completely covering the head of the tree. The flowers are followed by round seed-pods, making the tree attractive after the bloom disappears.

Each 10 \$9.00 4.00 4 to 5 ft.

If you want a fine winter lawn, plant our Rye Grass seed or Fruitland Evergreen Lawn Grass seed. To get the best results this should be planted by December 1st.

### LIRIODENDRON . Tulip Poplar

Liriodendron tulipifera (Tulip Tree). 200 ft. A magnificent, rapid-growing tree of pyramidal shape. Foliage broad and glossy. Flowers yellowish green, tulip-shape. Valuable for street and lawn planting and for lumber. Needs severe pruning when transplanting. Each 10 4 to 5 ft. \$ .50 \$4.50

### MAGNOLIA

Magnoiia acuminata (Cucumber Tree). 100 ft. Beautiful native pyramidal tree with very large bluish green leaves about 10 inches long. 2 to 3 ft. 75c each; \$6.50 per 10.

M. liliflora (Chinese Purple Magnolia). 25 ft. Makes a small tree of compact growth. Large, purple and white flowers are produced in great profusion the latter part of March, and scattering blooms the entire

M. liliflora nigra (Purplish Red Magnolia). 25 ft. Flowers several shades darker than M. liliflora. A free bloomer, commencing in March and blooming spasmodically during the entire summer.

### PRUNUS . Flowering Cherry and Plum

There is no group of exotic trees as handsome as the flowering cherries and plums. The Purple Leaf Plum is the handsomest of all the highly colored foliaged plants in the South. The Japanese Weeping Cherry is particularly beautiful planted at the end of walks or on the sidewalks. On page 7 you will find listed the Prunus mume, or Japanese Apricot, which is one of the earliest blooming of all the shrubs—frequently in full bloom in the coldest part of the winter.

P. cerasifera pissardi (Purple-leaf Plum). 10 to 20 ft. The most valuable of all purple-leaved trees. It retains its deep color throughout the warmest weather and its leaves last until mid-winter. We cannot endorse it too highly. 4 to 6 ft., 75c each; \$6.50 for 10. P. pendula rosea (Japanese Weeping Cherry). 10 to 20 ft. In early April the pen-dulous branches are covered with single, rose-pink flowers in clusters, and the tree is literally a mass of blooms. The flowers appear blooms. The flowers appear before the leaves begin to unfold. A most desirable variety. 5 to 6 ft., \$3.00 each.

### QUERCUS . Oak

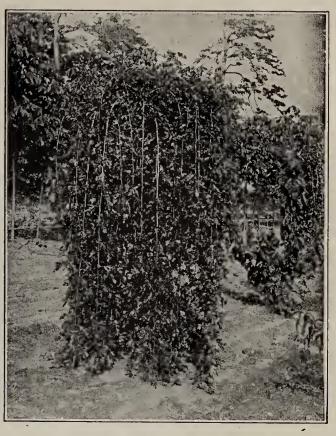

All of our Oaks have been several times transplanted and, therefore, have a good root system. Oaks must be the tree dying. The average person considers the Oak a very slow-growing shade tree. Fortunately, this is not the case, as growth is as rapid on these trees, considering their longevity, as it is on the average shade tree.

### EVERGREEN OAKS. See page 20.

Quercus alba (White Oak). 50 to 100 ft. A beautiful variety with spreading branches, broad, open head, and light gray bark. The foliage assumes a deep purple tint in fall. One of our finest Oaks, and very desirable for street and lawn planting.

Chinese Magnolia

Weeping Mulberry

- Q. nigra (Water Oak). 50 to 80 ft. Too well known to need description.
- Q. palustris (Pin Oak). 50 to 80 ft. Tree shapely and symmetrical. Leaves are a beautiful shade of green, in autumn turning to a brilliant scarlet. One of the most desirable trees for street and avenue planting.
- Q. phellos (Willow Oak) 50 to 80 ft. A graceful variety with narrow lanceolate leaves, resembling those of the willow. Well-known native tree, but extremely difficult to secure.
- Q. rubra (Red Oak). 50 to 80 ft. Hardy from New Jersey to Florida and Texas.

# BROAD-LEAVED EVERGREENS

# A Specialty of Fruitland Nurseries

Nowhere in the South can one find such an array of Beautiful Broad-Leaved Evergreens as at Fruitlands.

A view of some of our Broad-leaved Evergreens.

MODERN home-plantings cannot be considered as complete or hardly begun—if they do not contain a liberal supply of Broad-leaved Evergreens. They are needed for the green foliage which gives color all the year, especially in winter when warmth and color are demanded. There is need for them in all plantings, particularly in the outdoor living-room where they lay great claim to everyday beauty.

FRUITLAND NURSERIES has an unusually large collection of Broad-leaved Evergreens. The plants are frequently transplanted, carefully pruned, and given plenty of space to develop into stately, vigorous, and healthy specimens. Some varieties do not transplant successfully from the open ground, and therefore these are carefully grown in pot-form, thus assuring success when removed to your home.

The figure after each name denotes ultimate height of plant.

### ABELIA

Abelia grandiflora (Glossy Abelia). 6 to 8 ft. One of our most beautiful, popular and satisfactory Broad-leaved Evergreens. Pinkish white blossoms produced all summer. For single specimens, for groups, or for a hedge. Hardy as far north as Philadelphia, and has been grown successfully in sheltered positions in Massachusetts. Even when partially killed back, young shrubs flower profusely the same season.

Clumps,	8	to	10	leaves\$	.75
Clumps,	4	to	7	leaves	.50

AUCUBA . Gold-Dust Tree

This beautiful plant is not sufficiently appreciated. In the open ground it gives the best results if planted in a shaded situation, in a somewhat moist, though rich, well-drained soil. Aucubas are especially desirable for city gardens as they are seldom injured by smoke or noxious gases. These plants are also largely used for vases, urns and window-boxes. Hardy at Washington, D. C.

Aucuba japonica (Japanese Aucuba). 8 ft. A strong-growing variety with large, dark glossy leaves.

### **AZALEAS**

### AZALEA INDICA . Indica Azaleas

FRUITLAND NURSERIES, being at the northern limit where Indica Azaleas may be grown out of doors successfully, makes our plants much more hardy than the rapid grown Azaleas from the coast and Gulf. We quote a letter from one of our customers in northern Louisiana: "I have found Azaleas from your place to be the only ones to have come through the freeze uninjured. Please quote me on 100 Iveryana."

These beautiful shrubs are perfectly hardy in the open ground in the South, and by carefully selecting varieties a continuous supply of blooms may be had from January to May. Planted in masses of solid or well-contrasting colors, a pleasing effect is secured.

To get the best results, Azaleas should be planted in a slightly shaded location, and particular attention should be given to protecting them from the hot afternoon sun. The soil should contain an abundance of leaf-mold, peat, and sand, and should be well drained. Azaleas will not succeed in limestone soil. Mulching with decayed leaves, preferably those of hardwood trees, is a distinct advantage. If the plants are grown in pots they should be repotted after flowering and before the new growth begins; keep the plants sheltered for a few days and then plunge the pots into the open ground in a shady situation.

A group of Azalea indica (Fruitland) at the home of Mr. and Mrs. Josiah T. Clarke, Augusta, Ga.

FRUITLAND NURSERIES' AZALEAS are more compact, giving you more flowers, making them ideal for pot culture. Native host plants and a lack of water will subject Azaleas to attacks of red spider and lace fly. These insects usually hatch in May, and the plant should be sprayed with Black-Leaf 40 at the rate of 3 teaspoonfuls to 1 gallon water, and 2 to 3 teaspoonfuls of soapflakes to each gallon to act as a spreader. If the plants are seriously infested, spray at intervals of ten days, but usually a spraying in May and again in September will control the pests. Be sure that the underside of the leaf is thoroughly wet with the material. Immediately after new growth begins in spring, a few leaves will have "apples" on them; these cause no material damage, but should be picked off.

Peat is a splendid mulch for Azalea-beds, as it retains the moisture. No cultivation is required, for the roots are very near the surface of the soil.

We offer several thousand Indica Azaleas in about 50 varieties, and in the sizes here indicated.

### PINK AND SALMON COLORS

Croemina, tall, early, soft pink. 6-8 in. to 15-18 in.

Duc de Rohan, medium, midseason, salmon. 6-8 in. to 15-18 in.

Duke of Wellington, medium, late, salmon. 6-8 in. to 15-18 in.

Elegans Superba, tall, midseason, large pink. 12-15 in.

only.

George Franc, medium, early, pink. 6-8 in. to 18-24 in.

Miltoni, medium, late, clear pink. 12-15 in. and 18-24 in.

Model de Marc, medium, late, clear pink. 12-15 in. and

24 to 30 in.

Salmon Pink, dwarf, very late, and hardy. 6-8 in. to

15-18 in. Wm. Bull, tall, midseason, double brickdust. 6-8 in. to 2-3 ft.

RED, including Orange-red and Deep Pinks Brilliant, tall, late, carmine. 6-8 in. to 12-15 in.
Coccinea Major, dwarf, late, orange-red. 6-8 in. to 12-15 in.
Glory of Sunninghill, dwarf, very late, scarlet. 6-8 in. to 12-15 in. Pride of Dorking, tall, late, cerise-red. 6-8 in. to 12-15 in. Praestantlssima, tall, midseason, deep pink. 6-8 in. to 18-24 in.

Prince of Orange, medium, late, orange-scarlet.
to 15-18 in.

### LAVENDER

Formosa, tall, midseason, lilac, 6-8 in. to 3-4 ft.
Phoenicea, medium, late, lavender. 6-8 in. to 3-4 ft.
Violacea Rubra, tall, wine-red, late. 6-8 in. to 18-24 in.
Vittata Fortunei Purpurea, tall, early, lavender. hardy.
12-15 in. to 2-3 ft.

### VARIEGATED

Criterion, dwarf, late, pink and white. 6-8 in. to 15-18 in. Iveryana, dwarf, late, variable, pink and white, sometimes solid. 6-8 in. to 15-18 in.

Mme. Dominique Vervaine, tall, midseason, white, lavender pink throat. 6-8 in. to 2-3 ft.

Mme. Margottin, medium, late, almost solid white with few pink dots. 6-8 in. to 18-24 in.

Vittata Fortunel, tall, very early, one of the hardiest and best. Colors resemble peppermint candy. 6-8 in. to 3-4 ft.

### WHITE

Fielders White. Tall; early flowering; pure white. Hardy.

6-8 inches only.

lag of Truce, medium, midseason, double white waved petals. 6-8 in. to 18-24 in. Flag

Indica Alba, tall, early, and hardy. 6-8 in. to 12-15 in.

Supreme, tall, late, white. 6-8 in. to 2-3 ft.

In addition to this select list of varieties, we grow in limited quantitics all of the varieties which are satisfactory in this latitude, and invite requests for varieties not listed above.

# CAMELLIA JAPONICA

### One of Fruitland's Specialties

T is with considerable satisfaction that we look back over the history of Fruitland Nurseries and note that we were among the pioneers in introducing the exquisite Camellia japonica to Southern gardens. Even today it is a common thing to find Camellias fifty to sixty years old that originally came from our nurseries. Camellias, familiarly known as "Japonicas," are important plants in Southern gardens, and Fruitland Nurseries have given special attention to propagating the older varieties, as well as selecting the desirable new introductions. At the present time

we grow about 80 distinct sorts, and never before in the history of the firm have we had such a superb collection. Because of the scarcity of certain varieties we have only a few plants on hand and these are not here listed.

Should you not know the name of the variety that you wish, please send us a flower so that we may be able to indicate whether the variety is in our collection or not. We have been very successful in pleasing our customers and hundreds of orders of this kind are filled each season.

### CULTURE OF CAMELLIA **JAPONICA**

Camellias will grow in full sun if protected for the first few summers with a lattice frame. However, an ideal place

### A TRIO OF UNUSUAL VARIETIES

Daikagura. Semi-double deep pink. Begins flowering in late fall, lasting until spring. 15 to 18 in.\_\_\_\_\$3.00 12 to 15 in.\_\_\_\_ 2.00

Empress. Immense, semidouble, almost single, light pink flowers.

Each 24 to 30 in. \_\_\_\_\_ \_\_\$6.00

Kumasaka. Formation of flower similar to Herme, but a solid deep pink.

Each 18 to 24 in. \_\_\_\_\_\$4.00

for planting is where the plants get only a half day's sun. Do not plant in full shade, as they will not blossom as freely. In planting, the holes should be dug large. If the soil is not fertile, use the following mixture: one-half good garden soil; one-fourth well-rotted cow manure; one-fourth peat or leaf-mold, well mixed. After planting, mulch with half-rotted leaves or peat. Each spring Camellias should be fertilized with well-rotted cow manure, bonemeal and Vigoro or Loma. Always keep the plants well mulched and watered. The first two summers after planting are very trying on the plants and often prove disastrous unless these two simple things are done; watering and mulching.

The foliage is sometimes attacked by a scale insect, which may be readily controlled by spraying in January with Scalecide-1 part to 15 parts water. This sometimes burns the foliage, and if this is objectionable, use Garden Volck at rate of 1 part to 40 parts in summer; 1 part to 20 parts in winter. In spraying be sure to wet the underside of leaves. These spray materials may be found on page 42 of our Catalog.

### Group No. 1

### ILEX . Holly

"Again at Christmas did we weave The Holly round the Christmas Hearth."

We find the Holly one of the most cosmopolitan of plants, being distributed over North America, Africa, Asia, Europe and South America.

Ilex aquifolium (English Holly). 40 ft. This variety is good only near the coast where there is ample moisture. Bernes red. 15 to 18 in. .....\$2.00

I. cassine angustifolia. 20 ft. A narrow leaf native Holly having quantities of small red berries in the winter. Ideal for hedges. See page 26 for hedge plants.

KALMIA . American Laurel

Kalmia latifolla (Mountain Laurel). 10 to 12 ft. A beautiful, native, broad-leaved evergreen shrub, often attaining the size of a small tree. Its thick, waxy leaves are retained the year round, giving a striking effect. The pink and white geometrically shaped buds appear and expand into beautiful white and flesh-colored flower cups. Of greatest value for massing, making a hand-some effect in the landscape. All from open ground.

18 to 24 in., extra-strong clumps.....\$2.00 12 to 18 in., extra-strong clumps...... 1.50

### LAUROCERASUS . Cherry-Laurel

LAUROCERASUS . Cherry-Laurel

Laurocerasus caroliniana (Prunus caroliniana; Carolina Cherry-Laurel). 20 ft. Desirable as a single specimen or for grouping, as it makes a most effective background in landscape work. Can also be pruned in standard, pyramidal, and other formal shapes.

All plants from open ground. Each 10 4 to 5 ft., heavy, bushy, B&B. \$3.00 \$27.50 3 to 4 ft., heavy, bushy, B&B. \$2.25 20.00 2 to 3 ft., heavy, bushy, B&B. \$7.5 6.50 18 to 24 in., bushy, B. R. \$5.0 4.50 Sheared Piants: Each 4 to 5 ft., B&B \$6.00 3 to 4 ft., B&B \$6.00

### LIGUSTRUM . Privet

PLEASE NOTE that heretofore Ligustrum japonicum and Ligustrum lucidum have been incorrectly named. That which was called Japonicum is really Lucidum, and that called Lucidum is Japonicum. The Lucidum is tall growing, and the Japonicum is low growing.

FRUITLAND NURSERIES is happy that they were the first nursery in America to correct this error. Ligustrums are a group of plants which are indispensable to Southern plantings.

Ligustrum japonicum (Japanese Privet). 15 ft. A beautiful form of Japanese Privet. Leaves large, thick, ovate, lanceolate, of a very dark shining green. Large heads of white flowers produced in May, followed by black berries, which are retained throughout the winter. Hardy at Baltimore. A most desirable variety.

L. japonicum macrophyllum. 15 ft. A handsome variety with dark green, leathery, Camellia-like leaves.

### MAGNOLIA

Magnolia grandiflora (Southern Magnolia). 50 ft. The grandest of all our native broad-leaved evergreen trees. It is a native of the middle sections of the Southern States, and succeeds best in a rich soil. Nothing more conspicuous can be seen among evergreens when its large, white flowers are fully expanded. Their period of blooming begins in the middle of April and lasts until August. Hardy at Philadelphia. Each 10 6 to 8 ft., B & B. \$6.50 5 to 6 ft., B & B. \$6.50 5 to 6 ft., B & B. \$5.00 4 to 5 ft. 3.00 3 to 4 ft. 2.00 \$17.50 2 to 3 ft. 1.00 8.50

NOTE-To lessen liability of loss from transplanting, leaves will be removed, unless we are instructed to the contrary. Our Magnolias have been twice transplanted and have finely branched roots.

### MAHONIA . Holly Grape

M. bealei (Leatherleaf Holly Grape). 6 ft. A Japanese Barberry. Leaves very broad, with five pairs of leaflets. Flowers yellow, in long spikes, during the first three months of the year, followed by dark purple berries. A magnificent evergreen. This splendid plant thrives in almost any situation, but does best in a partially shaded location, where the ground is well drained. Hardy at New York in protected situations.

### ITRTUS . Myrtle

My (us communis (True Myrtle). 10 ft. South European, aromatic foliaged white summer flowering shrub. Tender here while young. Each 12 to 18 in. \$1.00

### NANDINA . Heavenly Bamboo

Nandina domestica. 10 ft. In China this is considered one of their favorite plants, and justly so. It is extremely decorative all the year. In the spring and autumn the large compound leaves are tinged with red; in early summer the large panicles of white flowers, and in the winter, the crowning glory, terminal spikes of large bright red berries which are retained until the following spring. Hardy to Washington and on Long Island. This is a FRUITLAND NURSERIES SPECIALTY.

### OSMANTHUS . Olive

Osmanthus fortunei (Fortune Olive; Holly-leaf Tea Olive). 25 ft. A strikingly beautiful shrub with dark green, spiny-toothed leaves resembling the holly. In the spring and fall the plant is covered with deliciously fragrant white flowers. Without doubt this is one of the most desirable broad-leaved evergreens. Does well in most any situation, but will give best results when planted in rich soil and in partial shade.

O. fragrans (Olea fragrans; Sweet Olive; Tea Olive). 18 ft. Small, white flowers which emit a pleasing fragrance are produced in clusters. The blooming period begins in the fall and lasts for several months. It is of easy culture. As a conservatory shrub for northern florists, it will be found invaluable.

### **GUARANTEE**

We guarantee every tree or plant to be in a perfectly healthy condition, up to grade and first-class in every respect when leaving our hands. Our Nurseries are free from disease. Certificate of State Entomologist is attached to every shipment. We fumigate our stock with hydrocyanic acid gas before shipping, as required by state law, so that the assurance of freedom from insects or disease of any kind is made doubly sure. We quarantee satisfaction.

### **PITTOSPORUM**

- Pittosporum tobira (Tobira Plttosporum). 10 ft. A fine, compact-growing shrub with dark green leaves clustered at the ends of the branches. Flowers yellowish white, very fragrant, produced the middle of April and last a long time. A splendid shrub for specimens or massing, and can be trimmed in fanciful shapes. These plants from open ground.
- P. tobira variegatum (Variegated Pittosporum). 10 ft. Similar to P. tobira but with leaves beautifully margined white and of dwarf habit.

Pyracantia (Fire Thorn)

### QUERCUS . Oak

- Quercus acuta (Japanese Evergreen Oak). 20 to 50 ft. Without doubt, this is the most beautiful Evergreen Oak ever introduced. Tree of medium growth, thriving in almost any soil.
- Q. suber (Cork Oak). 20 to 50 ft. The Oak which produces the cork of commerce. Usually the first crop of cork can be taken when the tree is ten years of age. It thrives well here and is ornamental as well as useful. Keep trees well mulched until thoroughly established.

Yucca

### PLANTING EVERGREENS

Nearly all plants taken from the open ground are lifted with a ball of earth around the roots. This is wrapped in moss, excelsior or burlap. Plants with burlap around the ball may be planted with the burlap left on. Before filling the hole, cut the string to loosen the burlap and release it from the ball. It need not be removed from under the plant. When moss or excelsior wrapping is about the earth ball, this wrapping must be carefully removed. In no case should the carth about the roots be disturbed. If the ball of earth falls away from the roots the plant must be defoliated and cut back. It is advisable to prune severely and defoliate such plants as Camphor, Elaeagnus, Ilex, Laurocerasus, Ligustrums, Neriums, Photinia, and Quercus.

Preparing the soil properly will give the best results. Dig holes of ample size. Place a layer of rich top soil mixed with compost in the bottom of the hole, set plant at proper depth, and fill hole half full with earth. At this point pour in water freely, but do not wash soil from roots. Allow water to settle, put in more soil and firm it about the roots; then fill up the hole. Place a mulch of well-rotted leaves to depth of from four to six inches about the plants for protection in winter and summer.

and summer.

### **TESTIMONIALS**

Trees received 20th inst., in fine condition. Am well leased. They are so well rooted.—Mrs. J. C. B., York,

Order received in perfect condition. Many thanks for the extra rose bush.—Mrs. J. C. W., Athens, Ga.

I must mention in conclusion that your catalogue is the most interesting among many I have examined— has the widest variety of fruits.—R. W. N., Demorest,

I want to thank you for the splendid Azalea bushes which arrived in excellent condition more than a week ago and were immediately set out. You are a most satisfactory firm to deal with.—Mrs. J. L. W., Tryon, N. C.

Many thanks for the more than the money's worth plants. I have always told the Northern residents here about you and have started several of your good customers to you. I recommend you because you are the best.—Mrs. L. I. G., Lugoff, S. C.

Inclosed 8c in stamps to cover balance due you on attached invoice. Shipment arrived in excellent condition. Thank you.—E. T. S., Spartanburg, S. C.

Please send me your latest catalogue. I was sorry to have to quit sending you flower orders, but my health would not permit my work. I consider your nursery the best in the flower business. The plants were fine and always came in good condition. Thanking you in advance for catalogue.—Mrs. R. W. H., Vicksburg, Miss.

I thank you for the nice substantial way you packed the roses I recently ordered.—Mrs. I. R., Monroe, Ga.

The Azaleas and other plants ordered from you recently arrived in splendid condition. Packing with your firm seems almost an art.—Mrs. H. E. G., Bamberg, S. C.

## Fruitland Nurseries Grow

# BEAUTIFUL CONIFERS

f Here at Augusta we have some of the most beautiful coniferous evergreens to be found. Wonderful soil, ideal climate, and expert growers make FRUITLAND conifers the best for you.

VERY day in the year the Evergreens have an important place in the landscape picture. In summer, the foliage enriches the color of shade trees and shrubs; in winter, when days are dull and gardens sleeping, the Evergreens show their forms and colortones in a most appealing fashion, and when the new growth breaks in spring we know that King Winter has retreated and that the "Time of the singing of birds" is at hand.

To keep Coniferous Evergreens beautiful through the years, they should be fertilized annually. The best season is in March, just before the new growth begins. Well-rotted manure is the best fertilizer to use. If this is not to be had, sheep-manure and bonemeal

A block of Cedrus deodara and other conifers

are very satisfactory. Keep the soil loosened. If plants are in beds, these beds should be worked up at least 6 inches from the outside of the branches. If specimen plants, make a circle at least 12 in, outside branches of plant. Keep this free from weeds and grass.

Practically all conifers may be pruned, and thus kept shapely. The only species not usually pruned are Pinus and Cephalotaxus. Shearing may be done not later than May and June, as growth is slow on certain varieties, and plant would be too formal and stiff during the winter if pruned later.

Very little spraying is necessary for Coniferous Evergreens—usually two sprayings of 16 tablespoonfuls of Fungi-Bordo and 2 teaspoonfuls of Black-Leaf 40 to each gallon of water will control the fungous and insect disease of these plants—one spraying in May or June and another in July or August.

Our conifers are grown in the most careful and scientific manner. Nearly all of the open-ground plants have been grown one year in pots and then in the open ground and are afterwards several times transplanted, and therefore have excellent root-systems.

The figures after each name denote ultimate height of plant. ARBORVITAE. See Thuja. BIOTA. See Thuja.

### CEDRUS . Deodar Cedar

Cedrus deaders. 50 ft. The Great Cedar of the Himalayan Mountain

### CHAMAECYPARIS. Retinospora

# JAPAN CYPRESS

Chamaecyparis lawsoniana (Cupressus lawhamaecyparis lawsoniana (Cupressus lawsoniana). Lawson Cypress from California and Oregon, where they are timber trees to 100 ft. In cultivation they usually are about 10 to 20 ft. Valuable, as they thrive in moist shady locations where so few conifers will grow. Should not be planted in dry hot locations. FRUITLAND NURSERIES has four distinct and beautiful varieties which we have selected as being the best for the South. South.

C. lawsoniana alumi (Blue Lawson Cy press). 12 ft. Foliage beautiful metallic silvery blue color. Branchlets flattened and very close together. A symmetrical tree, well adapted for use on the coast.

JUNIPERUS . Juniper

A most worthwhile and attractive genus of evergreens. In habit of growth they vary from prostrate, creeping shrubs to tall pyramidal trees, varying in foliage coloring from bright green to glaucous blue and bronzy gold. There are about forty species and innumerable varietics distributed from the arctic zone to the tropical mountains.

### SPREADING OR TRAILING VARIETIES

Here belong the most widely planted varieties, being used in foundation plantings and in rock gardens and terraces.

### JUNIPERUS—Continued

Juniperus chinensis pfitzeriana (Pfitzer's Juniper). 6 ft. This is the most widely planted of the spreading Junipers. Wide spreading branches pendant at ends. Foliage

a constant grayish-green.

J. communis depressa. 4 ft. Low spreading compact variety, with bluish-green foliage.

J. communis depressa aurea. 4 ft. Similar to the above,

but with young growth tinged a bronzy golden. Not

satisfactory on sandy soils.
sabina (Savin). 4 to 10 ft. Semi-prostrate. A native to the mountains of Europe. Good for an evergreen hedge.

Hardy and satisfactory.

J. sabina tamariscifolia (Spanish Savin). 2 ft. trailing form of great merit. Ideal for rock gardens and

squamata (Scaly Juniper). 3 ft. A very prostrate trailing Juniper from Asia, having pleasing glaucous green foliage. Grows well in sandy soil. The true type like FRUITLAND has is difficult to procure.

ince ricorrand has is unitell to procure.

You should consider FRUITLAND'S landscape service and avail yourself of its many phases; planning, planting, maintenance, treesurgery, pruning, spraying and lawn planting. Can't we help you with your garden problems?

### THUJA . Biota

#### ASIATIC VARIETIES

Thuja orientalis (Oriental Arborvitae). 10 to 30 ft. beautiful conifer without the golden tint. Variable in form, but the plants we offer are very fine and will prove most satisfactory. We shear our plants several times a year and give them plenty of space to develop, insuring a compact plant

- III G UI I II G	a compact plant.		
6 to 7 ft.	\$3.0	00	
5 to 6 ft.	2.0	00	\$17.50
4 to 5 ft.	1.5	50	12.50
3 to 4 ft.	1.0	00	8.50
2 to 3 ft.		50	4.50

### THUJA—Continued

T. orientalis aurea nana (Biota aurea nana). 8 ft. Introduced many years ago by Fruitland Nurseries under the name of "Berckman's Golden Arborvitae," and today is possibly the most popular Thuja for general use in the South or in the North. The golden yellow of the foliage makes a most pleasing contrast to the deep green of other evergreens. Specimens seem to be at their best when planted in well-drained soil and because of its extreme hardiness (having stood 15 degrees below zero without damage) it may be used in almost any location. The dwarf compact habit of growth makes it ideal for small gar-

Thuja orlentalis aurea Pyramidalis

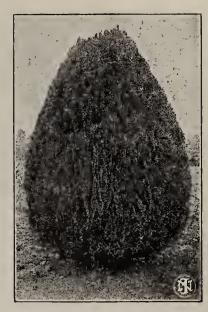

dens, for cemetery planting, for window-boxes and for vases.

				Each	10
3	to	4	ft.	\$3.50	\$32.50

12	to	15	in.		6.50

- T. orlentalis bakerl (Baker's Compact Arborvitae). 10 to 20 ft. A new variety, a hybrid of Rosedale Arborvitae. Stands heat and drought well. Pyramid shape, broad at base, tapering to a blunt point at top. Soft, light green foliage. Each 5 to 6 ft. only .....\$4.00
- T. orientalis texana glauca (Texas Bluc Arborvitae). 15 to 25 ft. A strong grower, tall and slender, with blue foliage. Each 10 to 12 ft. only......\$5.00
- T. orlentalis aurea pyramidalis (Golden Pyramidal Arborvitae). 25 ft. Foliage a beautiful golden tint. Its columnar habit adapts it to formal planting and suits it to lawn planting and evergreen groups. Ercct, symmetrical, and compact growth.
- T. orientalis pyramidalis (Pyramidal Oriental Arborvitae). 10 to 15 ft. The foliage retains its bright green color throughout the year, thus avoiding the unpleasant brownish effect of some other varieties during the winter season. This fact, coupled with its compact, upright habit of growth, makes it extremely popular for general landscape plantings.

Above t	wo Thujas:	Each	10
5 to 6 f	t	\$4.00	\$37.50
4 to 5 ft	t	3.00	27.50
3 to 4 ft	t	2.00	17.50

T. orientalis bonita. 8 ft. A beautiful broad, cone-shaped Arborvitae une-qualled in richness of color and perfection of form. Makes uniformly perfect growth, every twig being placed naturally in correct position. Slow growth makes it desirable where other shrubs would over-grow. An ideal Arborvitae for the finest plantings.

Thuja orientalis aurea nana The most popular Thuja grown. Originated at our Nurseries, Augusta

T. orientalls compacta. 8 ft. A dwarf Arborvitae of compact habit similar to T. orientalis aurea nana, but color a bright green.

Above two Thujas: Each 10 2½ to 3 ft. .....\$2.50 \$22.50 2 to 2½ ft. ..... 2.00 17.50

Thuja orientalis Frultlandl. 6 ft. A green type of the popular T. orientalis aurea nana. We originated this dwarf dark green variety a few years ago and have not been able to supply the demand for it.

Stock is limited.

Each 15 to 18 in. .....\$1.50 12 to 15 in. ..... 1.00

The Sand Hills Garden Club, sponsors a mid-winter Camellia japonica flower exhibition in their historic club house in Augusta, where thousands of exquisite Camellia flowers from all over the country are on display. The date is fixed by weather conditions, though usually in February.

Norfolk, Va., Columbus and Macon, Ga., besides other Southern cities, have exhibitions devoted to these magnificent flowers. Further information regarding these exhibitions will be gladly furnished by FRUITLAND.

# PLANTS for HEDGES from FRUITLANDS

WING to the volume production, FRUITLAND NURSERIES can give you the best and a greater variety of hedge material.

In the South we can have many beautiful hedges, as there are so many lovely plants so satisfactory for this purpose. Hedges are more pleasing than fences; they are less expensive and will not wear out.

### DECIDUOUS FLOWERING PLANTS

Cydonia japonica (Flowering Quince).	100

NOTE: To save freight, we always cut back Amur River Privet before shipping, unless instructed to the contrary. This also avoids the possibility of the plants heating, should there be delay in transit.

Viburnum	tinus (Laurustinus).	100
8 to 12 in.		\$25.00

### CONIFEROUS EVERGREENS

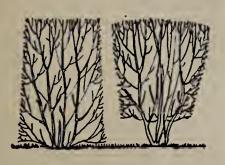

Juniperus sabina (Savin Juniper). 12 to 15 in\$3	5.00
Thuja orientalis (Oriental Arborvitae). 4 to 5 ft\$50	0.00

NOTE: Not less than 40 plants will be furnished at the 100 price; not less than 400 at the 1,000 price.

### PLANTING HEDGES

Prepare the ground by plowing or spading to the proper width and depth. Open the trench 18 inches wide by 18 deep. Apply to this a liberal amount of well-rotted stable manure, and if this is not available, bone meal or some highgrade fertilizer. Mix the manure or fertilizer thoroughly with soil. Set the plants in a straight line in the trench one foot apart, about one inch deeper than they originally stood in the nursery row. Firm the earth well about the roots, level off, and then cut the plants back to within four inches of the ground. In the spring, after the plants have made a growth of six or eight inches growth of six or eight inches, cut off one-half this growth, both sides and top, and proceed in a like manner with each succeeding growth until your hedge has reached the desired height and width. Cultivate well.

Prune hedges often; cspecially in early summer when the growth is prolific. The secret of a beautiful hedge is regularity in form and outline and density of foliage. By pruning carefully and to a line, one can secure the desired regularity. By pruning often, the growth is continually forced along the sides of the branches left untrimmed; voids will fill up and a smooth dense mass of foliage will result. Hedges must be trimmed on sides as well as on the top. Otherwise the hedge will get broader at the top than below. The lower branches will be unattractive. The ideal hedge is slightly A-shaped, being broader at the base. This permits the sunlight to reach all sides of the hedge.

# Hardy Ornamental Grasses

NUSUAL effects and delightful contrasts can be obtained by combining Ornamental Grasses with hardy plants in the garden borders. Grasses are also effective as ornamental screens and for bordering garden pools, or for mass-planting along the walk or driveway and in groups on the lawn. As the Grasses are perfectly hardy, they live from year to year and are continually increasing in beauty and in size of clumps.

### ARUNDO . Giant Reed

Arundo donax (Giant Reed). A fine hardy variety with long, green leaves.

A. donax variegata (Striped Giant Reed). A hardy, vigorous variety with long leaves, striped green and white. Very striking.

Strong roots, 25 cents each; \$2.00 for 10.

BAMBUSA. See Phyllostachys.

### CORTADERIA (Gynerium) . Pampas Grass

Cortaderia argentea (Common Pampas Grass). Silvery, plume-like spikes of flowers. An old favorite for grouping on the lawn.

C. Roi de Roses (Pink Pampas Grass). Plumes very compact, of a delicate rose-color. A beautiful and scarce variety.

All Cortaderias: Each	10
Extra heavy clumps\$2.00	\$17.50
Extra heavy	8.00
Strong clumps	6.00
Strong clumps	4.00

### **EXOTIC BAMBOOS**

Few plants, not even the palms, give such a graceful tropical appearance to the general landscape as do the various Bamboos. They thrive in any location, wet or dry, but for the first and second year they must be given water during the dry periods if planted in dry places. Bamboos are desirable for screening unsightly objects, and by the third season after planting they will be effective for this purpose. The dried cane may be used for light fences, fishing-rods, and similar purposes.

Arundinaria fastuosa. 40 ft. A Japanese bamboo related to our Southern Canc Recd so often used for fishing poles. In very limited quantities.

Bambusa multiplex distichia (Fern-Bamboo). 12 to 15 ft. A graceful, dwarf bamboo which spreads very slowly, making it ideal for small places and for hedges and screens.

Phyllostachys bambusoides (Japanese Timber Bamboo). 30 to 50 ft. The tallest of all the Bamboos. Spreads slowly.

P. bambusoides aurea (Golden Japanese Bamboo). 20 ft. A graceful Japanese variety, with quantities of yellow stems and very numerous delicate branches. Leaves green and drooping. One of the hardiest Bamboos.

P. green (Green Bamboo). 30 ft. A hardy variety of rapid growth, spreading by rootstocks. Should be given plenty of space to develop.

P. nevini. From China. 15 ft. A hardy, rather dwarf bamboo of running type. Has withstood zero temperature with little injury to leaves. Canes useful for staking plants, fishing poles and other purposes on the farm.

P. nigra (Blackjoint Bamboo). 25 ft. Stems become black with age. Most unusual and scarce.

Amella Earhart. HT. Patent No. 63. Yellow; very full, graduating from a deep yellow center to an outer collarette of large cream petals with a blush overtone; very fragrant. B. \$1.50 each.

Duchess of Wellington. HT. Long, saffron-yellow buds opening to very large, light yellow flowers. B.

Lady Hillingdon. T. Apricot-yellow; beautiful bud. Strong and vigorous grower; free bloomer. Excellent. B.

Luxembourg. HT. Makes large, beautifully pointed bud, and open flower, is full and compact. A deep golden yellow. B.

yellow. B.

Sunburst. HT. This beautiful Rose has been thoroughly tested, and it easily stands at the head of all sorts of its kind. B. & O. R.

### DWARF POLYANTHA ROSES

La Marne. D.Poly. Dwarf, pale pink. O.R. Orange King. D.Poly. Buds small; flower small, double, deep orange-yellow, in large clusters. Bushy, free Bushy, free

orleans. D.Poly. Deep cerise, with a distinct white center. Showiest and daintiest of the Dwarf Polyanthas. Flowers excellent for cutting purposes. O.R.

CLIMBING ROSES

We can furnish budded and own root roses. The letter B. after the descriptions denotes budded varieties, and O. R. denotes own root.

### PINK CLIMBING ROSES

American Pillar. HW. Large, single flowers of rich rosy pink, approaching brilliant carminc, with golden yellow stamens. Blooms profusely, almost covering the foliage. A vigorous grower and valuable climber. O. R.

Lady Hilllngdon

Anemone (Pink Cherokee). (Laev). Large, beautiful, single pink flowers. B. & O. R.

Cherokee, Plnk. See Anemone.

Cl. Killarney. Cl.HT. An exact counterpart of Killarney except that it is of vigorous climbing habit. Deep shell-pink. B.

Dr. W. Van Fleet. HW. Large, delicate flesh-pink, deepening to rosy flesh in center. O. R.

Elle Beauvillain. T. Soft rose with salmon center. Vigorous grower. B.

Lady Gay. HW. Bright rose-pink; similar to Dorothy Perkins, but later. O. R.

Madam Gregolre Staechelin. C.HP. (The Spanish Beauty). Buds long-pointed; very large, moderately fragrant flowers of delicate pink with deeper shade on outside petals. Disease-resistant; vigorous grower; abundant bloomer. B.

Mary Wallace. HW. One of the best and loveliest Wichuraianas yet discovered. Flowers a bright, clear rosepink, with salmon base to the petals; semi-double and well formed. O. R.

### RED CLIMBING ROSES

Climblng American Beauty. HW. Well-formed, fragrant, crimson flowers, 3 to 4 inches in diameter, in April and May. Strong grower. Holds foliage late. O. R.

Cl. Meteor. Cl.HT. Dark velvety crimson, shaded maroon. A grand Rose. O. R.

Hiawatha. HW. Brilliant ruby-carmine; clear white eye. Very distinct. Vigorous grower. Almost evergreen. O.R.

Paul's Scarlet Climber. HW. Vivid scarlet, shaded crimson. Makes a brilliant display for a long time in the garden. B.& O. R.

Ramona, H. Laev. (Red Cherokee). A companion to White Cherokee, but with red flowers. B.

Reine Marie Henrlette. Cl.T. The best bright cherry-red Climbing Rose. Of good form and vigorous habit. B. & O. R.

### You Can Succeed With Roses If You Follow Our Instructions

Planting. Before planting, cut out all weak growth, Planting. Before planting, cut out all weak growth, leaving the stoutest and most vigorous shoots. These must be cut back to within 3 to 6 inches of the ground, depending on the vigor of the plant. Dig a big hole and set the plant about an inch deeper than it stood in the nursery row, provided it is on its own roots. Budded Roses should have the budded portion set 2 to 3 inches below the level. Fill the hole half full of soil, pour in water, let this settle, put in some more earth, firm this well about the roots, then fill in the hole and firm when the job is completed. Water the plants whenever needed, and

put in some more earth, firm this well about the roots, then fill in the hole and firm when the job is completed. Water the plants whenever needed, and keep the soil well cuitivated.

Never use a spade in a Rose-bed, but use a digging-fork; this is less likely to cause injury to the roots. After the beds have been cultivated, rake the surface smooth and even. Frequent stirring of the surface is beneficial. A top-dressing of hardwood ashes is excellent.

Spraying. Aphis, thrips, black-spot, and powdery mildew are the chief Rose enemies. Aphis, or green plant-lice, attack the new growth of either the shoot or bud. Thrips work on the new growth, but usually in the flower, causing them to fail to open, turn brown and wither. Aphis may be removed by a strong stream from the hose. Both pests can be controlled by spraying with Garden Volck, using 1 part to 32 parts of water.

To kill thrip, cut off all open and partly open flowers early in the morning before spraying, and put the flowers in a bucket of water with a half-inch of kerosene floating on the surface.

Black-spot causes the leaves to turn yeliow and drop off, and will be found in the dark areas of the leaves. Powdery mildew appears on young leaves and shoots. Spray with Bordeaux Mixture, or one of the prepared Bordeaux Compounds, at intervals of a week or ten days until the disease is checked.

Kaiserln Auguste Vlktorla-Splendid Rose

### WHITE CLIMBING ROSES

Bankslan, White. B. Small, double, white flowers in clusters. O. R.

ters. O. R.

Cherokee, White. Laev. A fragrant, pure white Climbing
Rose that is thoroughly at home in the South. The
flowers are about 3 inches across and borne singly in late spring. It is a vigorous and rampant grower, with shining, glossy foliage, and makes a desirable covering for pergolas and trellises. O. R.

Cl. Devoniensis. Cl.T. An old favorite. Creamy white, flesh center; very fragrant. A good bloomer. B.

Cl. White Maman Cochet. Cl.T. A climbing form that will become as popular a climber as its parent has a bush Rose. White flowers tinged pink. O. R. Double Cherokee. See Fortune Rose.

Fortune Rose. (Double Cherokee). (Laev.). A double form of the popular Cherokee Rose. The flowers are 2½ to 3 inches in diameter, similar to the White Banksian. An evergreen climber, white blooms in late spring. O. R.

McCartney (Bractaeta). Practically an evergreen vine in the South, where it has become naturalized. A profusion of white blossoms in April, and sparingly through the season. O. R.

Mrs. Robert Peary. (Cl. K. A. Viktoria). Cl.HT. Creamywhite; very double. Large pointed buds. B.

Silver Moon. HW. Large, pure silvery white blooms. Vigorous growth. B. & O. R.

### YELLOW CLIMBING ROSES

Banksian, Yellow. B. Small, double, sulphur-yeliow flowers in clusters. A vigorous grower. O. R.
Emlly Gray. HW. A yellow Rose with glossy, undulated, holly-like foliage. The buds are long and golden yellow flowers are large and semi-double. B. & O. R.
Fortune Double Yellow (Gold of Ophir). N. Yellow, flaked with carmine. B.
Marechal Niel. Nois. Deep chrome-yellow. A great favorite. B.

#### VINES ⋘ **« >>**

7E are fortunate at FRUIT-LANDS to have such a variety of vines, as there are so many ways that they may be used. The Ampelopsis, Decumaria, Ficus and Ivy will cling to trees or stumps, and masonry, without The Ivy, Vinca and trellis. Mitchella are ideal ground covers for shady places. The remainder are handsome tall flowering vines. The Chinese Bignonia and Wistarias may be trained in standard forms, making lovely specimens.

# SHADE **FLOWER** and SCREEN

### **CLEMATIS**—Continued

C. paniculata (Sweet Autumn Clematis). Very fragrant. white, starshaped flowers produced in profusion during mid-summer and fall on long shoots. Handsome foliage. Extra-strong, 2-yr. field-grown plants, 25 cents each; \$2 per 10.

Note: Clematis does best in deep, rich soil. As soon as the plants are set out, supports on which to climb should be provided.

On account of the Large-flowering Clematis being hard to handle, even in packing, we cannot agree to replace any that do not live.

### FICUS . Climbing Fig

Ficus pumila (F. repens). An evergreen climber with small, bright green leaves, and an excellent plant for covering walls, rocks, and rustic work. Makes a dense, dark green covering. In protected situations the vine is hardy in Augusta. Delivery after April 1. Strong plants. 25 cents each; \$2.00 per 10; \$15.00 per 100.

#### GELSEMIUM . Jessamine

Gelsemium sempervirens (Carolina Jessamine). Our native variety. Many bright yellow, fragrant flowers, in early spring.

G. sempervirens flore-pleno (Double Yellow Jessamine). A rare sub-variety of our native Yellow Jessamine; double flowers in great profusion in early spring and more sparingly in the fall. Blooms in the conservatory, nearly all winter.

All Gelsemiums: Extra strong plants......\$ .75 Strong, nursery-grown clumps.......\$ .50

### DECUMARIA

\$3.00 2.00

Decumaria barbara. A native vine, almost evergreen here.
Rather fragrant, white flowers in corymbs, somewhat like a hydrangea.

Each Strong plants from pots.....

Strong plants from 5-in. pots......\$ .35 Smaller plants from 4-in. pots............25

AMPELOPSIS . Ivy

Ampelopsis tricuspidata (Japanese or Boston Ivy). A deciduous vine of rapid growth, suitable for covering walls, stumps, etc. Strong plants, 25 cents each; \$2 for 10.

ANTIGONON . Mexican Rose

Antigonon leptopus (Rosa de Montana). Commonly called Mexican Rose. The flowers, which are carried in long sprays, are bright rosy pink. It is a desirable Southern vine, blooming freely from June until fall. The foliage is heart-shaped, dense, and makes a good covering for porch or trellis. The top dies down in winter, and therefore the roots should be protected with a mulching of leaves. Growth does not begin until April, therefore shipment cannot be made until early April.

### BIGNONIA . Trumpet Vine

BIGNONIA . Trumpet Vine
Bignonia capreolata (Cross Vine). A
handsome, vigorous-growing evergreen, native climber, producing,
in early April, a great profusion
of trumpet-shaped flowers about 2
inches long, yellow-red on outside
with yellow throats. Hardy in
North. Strong plants from 3-in.
pots, 25 cents each; \$2 for 10.

B. grandiflora (Chinese Trumpet
Creeper). A desirable deciduous
variety of medium growth. Can
be kept trimmed as a bush, in
which form it is most effective.
Flowers very large, deep orange.
Commences to bloom in May and
continues nearly the entire summer. 50 cents each.

B., Mme. Galen. In all respects similar to B. grandiflora, except flowers are a deeper shade of orange.
50 cents each.

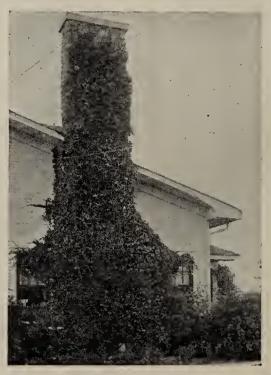

CLEMATIS

### CLEMATIS

Clematis jackmani (Jackman Clematis). Large, intense violet-purple blooms. Free and abundant bloomer. The most popular large-flowering Clematis. Extra-strong 2-yr. plants, \$1.00 each.

C., Mme. Edouard Andre. Large; violet-red. Strong grower and free bloomer Extra-strong 2-yr plants

bloomer. Extra-strong 2-yr. plants, \$1.00 each.

Ivy Covered Chimney

### HEDERA . Ivy

Hedera canariensis (H. algericnsis; Algerian Ivy). Very fine variety with pretty green leaves of immense size. A rapid grower and most conspicuous plant. Not quite so hardy as the English Ivy.

pots .

helix lobata major. An unusual light green Ivy with distinct white Scare. veins; prominently lobed. Scare. Plants from 2½ in. pots, 25c each. HONEYSUCKLE. See Lonicera. JAPANESE or BOSTON IVY. See Ampelopsis.

### KADSURA

Kadsura japonica (Scarlet Kadsura). A handsome, Japanese Climbing evergreen. Leaves 4 to 5 inches in length, dark green. The young growth of both the stems and leaves is red, giving the plant a bright appearance. Each 10 Strong, 2-yr. plants..\$ .25 \$2.00

### LONICERA . Honeysuckle

Lonicera browni (Brown's Honeysuckle). A strong, rapid-growing evergreen variety with orange-scarlet flowers in April. This is a

Trumpetcreeper

#### LONICERA—Continued

decided improvement on L. sempervirens (Woodbine) both as to foliage and bloom.
. heckrotti (Everblooming Honeysuckle).
Flowers rose-colored on the outside, yellow in the center. A most excellent evergreen variety. Blooms continuously from early spring till winter.

L. japonica halliana (Hall's Japanese Hon-. japonica halliana (Hall's Japanese Honeysuckle). A very vigorous evergreen climber. White flowers changing to yellow are borne in great profusion in late spring or early summer, and again sparingly in the autumn. Good for trellis and ground-covers.

.. sempervirens sulphurea. Similar to native Honeysuckle, except flowers are yellow. Usually blooms when plant is two to three years old.

low. Usually bloom to three years old. All Loniceras:

Each 

#### MITCHELLA . Partridgeberry

Mitchelia repens. A native evergreen, trailing vine, with red berries in winter.

#### Each \$15.00

#### TRACHELOSPERMUM . Star Jasmine

Trachelospermum jasminoides (Rhynchospermum jasminoides; Confederate Jasmine). The best evergreen climber for this section. A very beautiful, hardy, and rapid-growing plant producing an abundance of fragrant, starshaped, white flowers from April until July. Very conspicuous when in

FRUITLAND and Augusta extend you a cordial invitation to make Augusta your home. If it can't be yearround and you are contemplating a winter home, you will find, as so many Northern and Western residents have, that this section is ideal in every respect. Augusta is famous for her wonderful golf courses, marvelous climate, magnificent hotels and winter homes.

Extra-strong plants from pots	.\$ .40	\$3.50	\$30.00
Strong plants from pots	25	2.00	17.50

#### VINCA . Periwinkle

Vinca major (Bigleaf Periwinkle). An old and favorite plant, with large blue flowers in early spring. Leaves larger and a more vigorous grower than V. minor. Excellent for vases, rock-work, and bordering slopes. 

#### WISTARIA

All of our Wistarias are grown from free-flowering plants, and these must not be confused with the Wistarias which are grown from seed.

Wistaria floribunda rosea. Rose-colored or pale pink flowers.

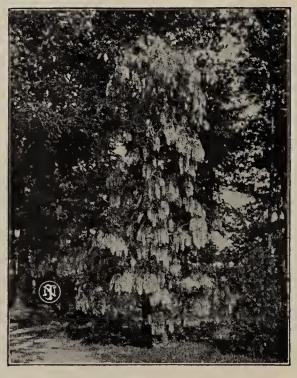

W. multijuga (Longcluster Wistaria). Flowers about a week later than W. sinensis. A distinct and showy variety. Flowers single, light purple, in loose racemes one to three feet long. Does not bloom freely until vine is about three years old.

Lonicera browni

- W. sinensis (Chinese Wistaria). The well-known, single purple variety. Free
- W. sinensis alba (White Chinese Wistaria). A beautiful graceful, white-flowering climber.
- W. sinensis flore-pleno (Double-flowering Wistaria). A shy bloomer until the vine is three years old but afterward it blooms freely. Color: Purple.

All Wistarias: Each 10 3-yr. grafted plants ......\$1.00 \$8.00 2-yr. grafted plants ...... .75 6.00

Plants from 5 in. pots, 50c each.

In addition to this short list we can supply other decorative and bedding plants, too numerous to mention. No doubt we can supply your wants. Just write us.

# IF YOU PLANT FRUIT TREES—Read This Page

When to Plant. As early as possible after the first killing frost, although hardy stock can be transplanted safely at any time during the winter when the ground is not frozen or too wet. Planting can be continued until about the middle of March, or just before the buds begin

tinued until about the middle of March, or just before the buds begin to swell.

Care of Trees on Arrival. If not ready to plant immediately, dig a trench, unpack the trees and heel in, cover the roots with earth, and water freely. If trees are frozen when received, place them in the cellar or a cool room that is free from frost, and let them remain there until the frost is out. If a cellar is not available, bury the box in sawdust or dirt. If frost is drawn out slowly, trees will not be injured.

Preparing the Trees for Planting. Remove all broken roots. Cut back one-year peach, apple, cherry, pear and plum trees to a naked stem, 1½ to 2 feet high, leaving no side branches. Two-year-old trees should have branches cut back to half their length, the lower limbs shorter than those immediately above, then cutting them shorter as you go upward, leaving a long leader. The tree should be set about 2 inches deeper than it stood in the nursery.

Preparing the Soil. Fruit trees succeed best in rich loam, naturally dry or made so by drainage. Prepare the land by plowing and subsoiling. Make the holes at least 2 feet wide, and 2 feet deep. Cover the roots with surface soil, tamping thoroughly as the hole is filled. Use thoroughly rotted manure or bonemeal mixed with the soil. Do not put fresh manure

around the roots.

Cultivation. Stir the soil frequently during the summer to conserve moisture and remove weeds. Cut suckers or branches that start below the head. Lime, bonemeal, or a high-grade commercial fertilizer may be used as required. For two or three years crops may be grown between the trees—cotton, melons, peas, peanuts, velvet or soy beans. In fall use a cover crop of clover, vetch, or rye, turning this under in spring.

#### SUMMER APPLES

Coffman (Summer Red; Coffman June). Medium large, roundish oblong; greenish yellow, striped and splashed with red, with white dots; flesh white, julcy, good quality. Upright grower. Last of June.

Early Harvest (Early June-eating; Yellow Harvest). Medium to large; bright yellow; tender, juicy, well-flavored. An excellent home-market Apple; invaluable in any orchard. June 5, and lasts two to three weeks.

Horse (Haas; Summer Horse; Yellow, Red, or Green Horse, etc.). Large green; acid. Good for cooking and drying. A productive variety. July,

Ransas Queen. Large; yellow, nearly covered with crimson; good quality. Reliable, productive, and a good market variety. Succeeds well on light sandy soil. July, August.

Red Astrachan (Red Ashmore; Early Rus; etc.). A beautiful fruit. Large; yellow, nearly covered with crimson, and fine bloom; juicy, crisp, acid. Tree thrifty and profitable grower. Ripens end of May and continues through Lune.

Red June (Carolina Red June, etc.). Medium, conical; deep red; juicy. Very productive. June 15 to end of July.

Yellow Transparent (White Transparent; Grand Sultan, etc.). Among the finest summer Apples. Fruit yellow and white, crisp, slightly sour, and exceptionally good quality. Tree is a natural low grower, and bears a good crop, even when small. June.

#### AUTUMN APPLES

Bonum (Magnum Bonum). Medlum; deep crimson; firm, tender, juicy, mild, subacid. September, October.

Grimes (Grimes' Golden). Medium, round, oblate; skin yellow, with small dots; flesh yellow, crisp, rich, subacid; good. October.

Shockley (Waddell Hull; Sweet Romanite). Medium, conieal; yellow, with a bright crimson cheek; flesh firm, sweet or subacld, with some flavor. Trees erect, vigorous, exceedingly productive. Ripcns in August and will keep until following summer.

#### WINTER APPLES

Delicious. Well named because of quality. A popular western Apple, but equally good in any other section. Skin greenish yellow, almost covered

#### APRICOTS

Apricots are best adapted for city gardens, or where trees are protected by buildings. They are delicious fruits, and, therefore, a little extra care should be given to protect the flowers from late spring frosts. The trees, when planted in orchards, seldom last long here, unless protected by timber or tall-growing fruit trees. Ripening period from about June 1 through July.

#### FIGS

Adapted to a wide range of soils and climates. The trees should be planted 12 to 18 feet apart, according to character of soil, and should be trimmed to admit plenty of light and air into the center of tree. Ripening period from June to November.

Lach 10

Celeste (Sugar; Celestial, etc.). Medium; pale violet, with bloom; sweet and excellent. Early. Hardiest of all Figs.

Green Ischia (White Ischia). Medium to large; green with crimson pulp; excellent. Mlddle of July until frost. Only 3-yr., \$1.00; 2-yr., 75c.

#### PEACHES

A sandy loam is best suited to the Peach, but it will adapt itself to almost any soil, provided it is well-drained. Plant June buds or one-year-old trees 18 by 18 feet; cut back to 18 to 24 inches, to have a low-headed tree. In spring, after the growth has started, remove all but three branches and let these be distributed so that the tree will be well-balanced. For the first two years fertilize with well-decomposed barnyard manure, or a mixture of one part of cottonseed or bonemeal to two parts of Acid Phosphate. Apply 1½ to 2 pounds to each tree. After the third year use a fertilizer containing a good percentage of bone phosphate and potash, and a small percentage of nitrogen. Prune every year by cutting off one-third of the previous year's growth. The head of the tree should be broad and open, so as to allow free circulation of light and air. Never plant newly cleared woodlands; such lands should be cultivated for at least two years before setting the trees, otherwise wood-lice will injure them.

In preparing orchard land, plow as deeply as possible, and then subsoil. Dig holes 2 feet, or use dynamite for making the holes. Cowpeas, soy beans, or velvet beans are excellent crops for planting between the trees; it is best to drill-in 2 feet apart, leaving 4 or more feet on each side of the tree for cultivation. Cultivate frequently, and in the late fall or early winter turn under the cover crop. When the orchard begins to bear it should have clean cultivation, but as soon as the fruit is harvested, drill in peas for a cover crop and turn this under as above directed.

Chinese Cling. Very large; creamy white, mottled carmine; flesh, fine-grained, meltlng, vinous. July 20 to August 1.

Indian Cling. The old reliable Ante-Bellum Indian Cling.
Fruit medium to large; skin dark, mottled blood-purple; flesh firm, juicy, streaked with red. Last of July to middle of August.

Event A meet decirable variety which originated at August.

Kent. A most desirable variety which originated at Augusta, Ga. Fruit large, slightly depressed at apex, skin greenish-yellow, buttery and of exquisite flavor; skin very tough, but peels readily. July 25th to August 5th. Red Bird. Large fruit, brilliantly colored, of fair quality, and a splendid shipper. Tree hardy; good bearer. June 15 to 20.

Stinson. Large; white, with red cheek; good flavor. The most profitable late Peach for Southern market. Middle of October.

#### DEPENDABLE PEARS

Pears are most successfully grown in well-fertilized, heavy clay or clayey loam. If grown in sandy soil, coarse manure or litter should be worked into the soil. Mulching is of great benefit, and the orchard should be kept cultivated at all times.

This list has been reduced to varieties that have proven valuable throughout the largest section of the South. Plant Standard trees 20 to 25 feet apart.

Each 

August.

Garber. Resembles the Kieffer in size, appearance and quality, but matures here in August, between the Le Conte and Kieffer. A thrifty grower and valuable variety.

Kieffer. Fruit large to very large; skin yellow, with a light vermilion cheek; flesh brittle, very juicy, with a marked musky aroma; quality good. Tree vigorous and very prolific. Begins to bear when four years old. September. October.

tember, October.

Koonce. Medium to large; very handsome; juicy; sweet.
Tree a vigorous grower. Middle of June.

Le Conte (Chinese Pear). Fruit large; skin smooth, pale yellow; quality very variable, but if allowed to mature slowly in a cool dark room, improves remarkably. July 20 to end of August. Trees begin to bear when five years old.

years old. Seckel. Of exquisite flavor. The standard quality in Pears.

Tree a stout, slow grower. September.
P. I. No. 49494. Medium-sized fruit, about 2½ inches long; flesh sweet, juicy, soft, rather fine grained, melting, of good flavor. Early October.

#### JAPAN PERSIMMONS For the Fall Market

The Japan Persimmon is thoroughly at home in the Cotton Belt, and does especially well in the Coast Region. Some varieties succeed in middle Kentucky, Virginia, and in southern New Jersey. If the fruit is harvested before it is touched by frost, and house-ripened, the quality becomes greatly improved. Some varieties have dark flesh, which is edible while the fruit is still hard, but the light-fleshed varieties must be thoroughly matured before they can be eaten, as they are very astringent until fully ripened. The fruit of nearly every variety begins to color when half grown, but should be allowed to hang upon the trees until just before frost is expected, or in the case of early-ripening varieties, when fully matured. Many of the late-ripening varieties can be kept until February. Distance for planting, 15 to 25 feet apart each way.

Tamopan (Big Grindstone). Fruit bright orange-red; skin thick and tough; flesh light-colored, seedless, of excellent quality; some without astringency and can be eaten while hard. The tree is a thrifty grower.

Zenji. Fruit small, 1¾ to 2 inches in diameter; weight 3 to 4 ounces; flesh sweet, dark brown, with dark spots. Edible as early as middle of September while still solid.

Very prolific.

#### PLUMS FOR SOUTHERN GARDENS

good, freestone. A good cooking fruit. June 1 to 15. Tree of vigorous growth.

Red Nagate (Red June; Long Fruit). Skin purplish red, with blue bloom; flesh yellow, solid, somewhat coarse-grained, juicy, subacid, with Damson flavor, good quality clingstone. Ripens a week before Abundance, and is the earliest large-fruited market variety.

Satsuma, or Blood Plum (Yonemono). Large, globular, or with sharp points; skin dark purplish red, mottled with bluish bloom. Flesh firm, juicy, dark red or blood-color, well-flavored and firm, quality very good. Unsurpassed for canning. Mid-July. Tree very vigorous. One of the most valuable varieties for this section.

Shropshire Damson. An European variety with medium size, dark purple fruit. Good for preserving. Very productive.

ductive.

Wickson. Fruit large to very large; waxy white when halfgrown, then changes to pink and to dark crimson-purple; flesh firm, yellow, juicy, subacid and highly flavored; pit small, clingstone. July 10 to 25.

Wild Goose (Chickasaw Type). Large, somewhat oblong; bright, vermilion-red flesh; juicy, sweet, of good quality, cling. A very showy and profitable Plum. Middle of June.

#### **ASPARAGUS**

Asparagus is considered one of the most healthful vegetables—a regular spring tonic, so to speak. Everyone should have it fresh from their own garden. It is adaptable to nearly any soil, but grows best in rich sandy loam. Do not plant in stiff clay or hard land.

Mary Washington. \$1.50 per 100; \$7.50 per 1000.

#### POMEGRANATES

Hardy in the Gulf States and central section of Georgia and the Carolinas. Plants often attain a height of 20 feet, are of good form and foliage. Bright scarlet flowers make it a most ornamental plant. It bears early and profusely. The demand is increasing in eastern markets and the pome-

# MISCELLANEOUS FRUITS

#### BLACKBERRIES

Blackberries thrive in almost any soil, but do their best in a strong loam, retentive of moisture, tending toward clay rather than sand, but it must be well-drained at all times. Fertilizers containing a good proportion of potash are the most desirable. To prevent rust, spray with copper-sulphate solution during fall and winter, and with Bordeaux Mixture (4-6-50) during spring and summer. The rows should be 6 to 8 ft. apart and the plants from 3 to 4 ft. in the row, according to the eharacapart and the plants from 3 to 4 ft. in the row, according to the character of the soil. If desired to cultivate both ways, set the plants in checks, 6 to 7 ft. each way. As soon as the fruiting season is past, remove the old canes and burn at once. The young canes should be clipped. This will cause them to branch and they will become self-supporting. Apply fertilizer during the late winter and give shallow and constant cultivation.

Eldorado. The large berries, borne in big clusters, ripen well together. Very sweet—no core. A heavy bearer and a valuable sort.

Himalaya. Strong grower; very pro-lific. A desirable variety. On ac-count of quick growth should be grown on trellis.

Mersereau. A most valuable variety. Fruit of immense size. Early and enormous bearer. Very hardy.

DEWBERRIES

Use short, stout stakes, driven at the end of each row of canes, with a cross-piece 18 in. long nailed to each stake, 2½ to 3 feet from the ground. On the top, near each end of these cross-pieces, drive a stout nail, slanting toward the stake, upon which to catch a wire. Two lines of No. 14 galvanized wire. one on each side of the row, are fastened to one end of the stake and run on the ground between the rows to the other end stake. Draw wires as taut as possible and securely fasten to the other cnd of the row. The wires are now raised and eaught on the nails, thus holding all the eanes closely together in the row. Dewberries should be mulched to keep the berries from the ground.

Blackberry

Austin's Improved. Very large frult. Vigorous grower and productive. The best variety for the South.

Lucretia. Low-growing. In size and quality of fruit it equals any of the tall-growing sorts. Hardy and very productive, with large, showy flowers. Fruit sweet and luscious. Early. Early.

#### RASPBERRIES

These thrive best in a deep, moist, well-drained soil; the lighter loams are best for the red sorts, and the heavy loams for the blackcaps. Cotheavy loams for the blackcaps. Cottonseed meal, pure ground bone, or fertilizers containing a good proportion of potash are best and should be liberally applied during the winter and early spring. To get the best results and keep the plants in vigorous condition, they must be mulched heavily with straw.

Cumberland (Black). Very large, firm berries of high quality. The best midseason market variety, giving the utmost satisfaction to both grower and shipper.

Cuthbert (Queen of the Market) The best and most reliable of the red-fruited varieties. Fruit large, red, and of excellent quality; rlpens middle of May and continues for several weeks. Prolific bearer. Fine shipper.

Latham. Large; red; luscious. Very productive. Splendid shipping qualities.

Ranere (St. Regis). Berries large, bright crimson; flesh rich. Wonderfully prolific. Produces its fruit early and through a long period. We consider it one of the best Raspberries ever sent out.

#### YOUNGBERRIES

Youngberries. Fruit larger than Dewberries, with a decided flavor of Raspberry. Splendid for home use, but will not ship well. Delivery in March.

#### PRICE ON ALL ABOVE BERRY PLANTS

10c each; 80c per 10; \$6.00 per 100.

# GRAPES—We Have the Best Varieties

In transplanting Grapes, leave the main branch and cut this back to two or three eyes. this back to two or three eycs. The usual distance for planting Grapes is 10 by 10 feet. If you want to get good results from your Grapes prune annually. The varieties here described have been thoroughly tested in this section. Our plants are strong and Our plants are strong and

ground.

Our plants are strong and vigorous.

Strong plants, 25c each;
\$2 for 10; \$15 per 100.

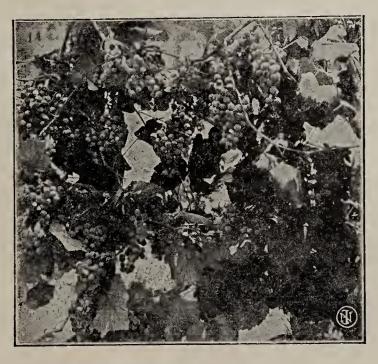

Amber Queen. Palc amber berries of medium size, with sweet, fine flavor. Long branches.

Brighton. Bunches medium size; berries large, reddish; skin thin; quality best. Excellent for early table or market. Vigorous.

Caco. Most delicious of all red grapes. Very sweet and tender. 30c each.

Catawba. Large bunch and berry; deep red, with lilac bloom; juiey, vinous, and of musky flavor.

Concord. Bunch and berry,

very large, blue-black, with bloom; skin thin, cracks easily; flesh swect, pulpy, tender; quality good. One of the most reliable and profitable varieties.

Delaware. Compact bunch; beraware. Compact bunch; berry medium, light red, quality best. Moderate grower, but vine healthy, prolific, and more free from disease than any other variety. The most popular Grape grown. Unsurpassed for table and white wine. white wine.

Ives. Bunch large; berry large, blue; skin thick; flesh pulpy, sweet and musky. Vigorous grower and prolific bearer.

Knight. Bunch compact; berry medium, bluc-black. Vigorous grower. Ripens last of July; fruit matures for a long period.

Lindley. Bunch medium, loose: berry medium to

Lindley. Bunch medium, loose; berry medium, to large; color red; flesh tender, sweet, rich, aromatic flavor. Midseason.

Spray your trees, it pays.

#### GRAPES—Continued

Moore Early. Bunch medium; berry large, round, black with heavy blue bloom; medium quality. Early and Early and desirable.

Niagara. Bunch and berry large; greenish yellow; flesh pulpy, swect, foxy. Its remarkable size and fine appearance give it much popularity as a market variety. Vigorous and prolific.

#### BULLACE, OR MUSCADINE GRAPES

Vitus rotundifolia or vulpina. This type is purely Southern, and Is of no value for the northern or western states. Vine is free from all diseases. The fruit never decays before maturity. Cultivation is reduced to the simplest form—plant from 20 to 30 ft. in row; train on an arbor or trellis.

Each 100 \$4.50 2.00 \$35.00 17.50 Flowers. Bunches have from 15 to 25 berries; black and sweet, vinous flavor. Matures from end of September to end of October, or four to six weeks later than Scuppernong.

James. Berries large, blue-black, in clusters of from 6 to 10; skin thin; pulp tough, sweet and juicy, but not dissolving; quality good. A showy fruit. Ripens after

Scuppernong. Berries large; seldom more than 8 to 10 in a cluster; color brown; skin thick; flesh pulpy, flavor sweet and of a peculiar musky aroma. Vine is free from all dis-eases and insect depredations. Wonderfully prolific, and

Thomas. Bunches of 6 to 10; berries slightly oblong, large, violet, quite transparent; pulp tender, sweet, and of a delightful vinous flavor. Best of type. Very little musky aroma. Middle to last of August.

#### ALMONDS

Almonds can be successfully grown in some sections of the South, but, owing to their early blooming periods, the fruit is sometimes killed by late spring frosts. The Almond requires the same cultivation as the peach.

desirable California variety. Sturdy, upright grower; nut large; soft shell; heavy bearer. 1-yr., 3 to 4 ft., 75c each; er. 1-yr., 3 \$6.50 for 10.

#### BUTTERNUTS

Butternuts (Juglans cinerea). Tree large. Native New Brunswick and Georgia to Dakota and Arkansas. Fine autumn color. Fruits in clusters a Warnelle sweet and adiabate term. ters. Kernels sweet and edible. Fine for orchards or specimen planting. 3 to 4 ft., 75c each; \$6.50 for 10.

#### WALNUTS

English or Persian (Juglans regia)

Requires a rich, well-drained, and preferably stony soil. Never plant in hardpan, heavy clay, or soils which are not properly drained. In some sections of the Eastern and Southern States the English Walnut is quite successfully grown. 18 to 24 in., 75c cach; \$6.00 for 10.

panese. Particularly successful in the Southern States. The tree is very handsome and has a large, spreading top. It makes a useful as well as an ornamental tree. top. It makes a useful as well as an ornamental tree. At three years of age the tree commences to bear. The shells are moderately thick, but the kernels are very sweet. 2 to 3 ft., \$1.00; \$8.50 for 10. 18 to 24 in., 50c each, \$4.50 for 10.

#### PECANS

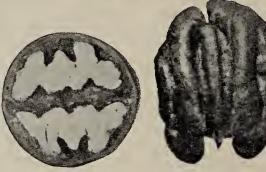

Pecans are a paying investment when the proper stock is used and given the right soil and climate. We offer the best varieties, bearing nuts of large size, good flavor, thin shell and of easy cracking qualities, all of which are propagated from grafts or buds on three-year seedlings. They are hardy and satisfactory.

Plant Pecans 50 to 60 feet apart, according to soil, which should be good. Pecans grow well on rich bottom soils, on high land of the sandy pine-levels, on sandy soil where there is clay subsoil, but not in deep sand and never in pipe clay or undrained land. A sour soil will kill or injure the trees and never be satisfactory. To get crops, you must cultivate, fertilize, and properly prune the trees. The Pecan is long-lived. Our trees, if properly cared for, should bear in five years, bear paying crops at eight years, and should produce 16-20 pounds of nuts per tree at 10 years.

Planting and Cultivating. After Pecans reach maturity in fall, transplant any time until March. Keep roots covered with moss or wet sacks at all times before planting—they must not dry out. Dig hole for tree before exposing

roots. Hole should be 2 feet wide and deep enough to set tree a trifle lower than it stood in nursery. When hole is dug, take one tree and cut off ends of broken roots with sharp knife. Cut off part of taproot so the tree will force lateral roots. Fill hole half full around roots with well-pulverized top-soil enriched with either the proper amount of well-rotted stable manure, bonemeal, or highgrade fertilizer, thoroughly mixed with the soil.

Pack earth firmly as the hole is filled, but leave 2 inches of loose filled, but leave 2 inches of loose soil on top. When soil is very dry, pour water in hole when partly filled. Trees over 4 feet should be cut back to 4 feet in height after planting. Be careful not to break eyes of trees when handling. Keep trees cultivated and properly pruned. Between the rows you may plant cotton, potatoes, melons, or any cover-crop for several years, but never small grain. When trees go into bearing, plant and turn under a cover-crop of soy beans, vetch or clover.

a cover-crop of soy beans, vetch or clover.

Excellent results are obtained in planting Pecans with dynamite—one-half pound of dynamite placed 2 feet below level is ample. This breaks the sub-soil, and permits the long taproot to find food on lower levels.

For fungous diseases and insects injurious to the Pecan, see Spraying Table on page 43.

Frotscher. Very large, nuts average 45 to 50 to the pound. Shell very thin; can be cracked with the teeth. Meat sweet and of fine quality, and can be removed entirely from the shell. One of the best Petals grown, bringing good prices on all markets, and yielding profits to the grower.

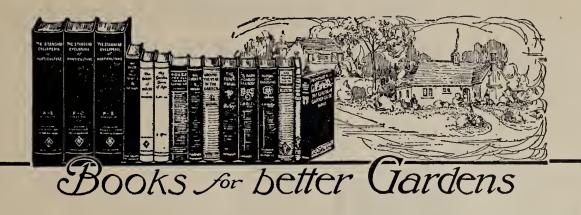

Moneymaker. It is an early bearer, prolific, healthy, and remarkably free from nut diseases that ruin a great many of our best varieties of Pecans. Size medium, rounded, oblong. A heavy bearer of splendid nuts.

Schley. Medium to large; 1½ to 1% inches long; oblong, slightly flattened. Shell thin; plump, rich flavor. Good grower. One of the best varieties because of size, appearance, and quality. Has few equals as a market nut.

Stuart. Nut large to very large; 1¾ to 2½ inches long; oblong; shell of medium thickness, and of very good cracking quality. Kernel full, plump, of best quality. Flavor rich and sweet. A good grower; heavy bearer. An excellent variety thriving over a wide section of the South.

Success. A good-growing, heavy-bearing tree. Nuts large and oblong, of good quality. Thin shell. Nuts full of juicy, sweet meat.

### SPRAYING MATERIALS and SUPPLIES

It pays to spray fruit trees and grape-vines if you want the best fruit. Spraying can be easily done and spraying apparatus can now be had for a small sum. On page 43 a small sum. On page 45 is a complete spraying guide which gives information on sprays to use for different insects and diseases. For success in spraying, follow this guide and use the right mater and use the right material. It does not pay to experiment. We offer a few reliable Spray Pumps and materials for your convenience.

Sterling, 115G. 31/2 gal. capacity. 4.60 Sterling, 115B. 31/2 gal. capacity. 7.25 Misty Sprayer. Sturdy construction. No. 452G—Galvanized tank, 1-quart, 50c each.

No. 452B-Copper Tank, 1-qt., 75c.

#### Pruning Shears

Indispensable in every garden-you can't do good work without a pair. Pexto Shears are American-made, 9 inches long, first-quality steel, and offered at only \$1. Postage extra.

#### Labels, Plant

Copper Wire. 3½-in. 50c per 100; \$3.00 per 1000.

Pot. 10x5/s in., 85c per 100; \$2.00 for 250. The 3½-in. Labels are put up 500 to a box, and the 10x5/s-in. 250 to a box.

### Wizard Brand Sheep Manure

\$2.75 per 100 lbs.

#### Bonemeal

\$3.00 per 100 lbs.

#### Peat

Imported. \$3.00 per bale.Fiorida. \$3.00 per bale (7 cubic feet).Prices on ton lots on application.

#### Insecticides and Fungicides

Arsenate of Lead. (Powder). Lb., 35c.

Black-Leaf 40. Oz., 35c; 5 ozs., \$1.00; 1 lb., \$2.25.

Bordeaux Mixture. Lb., 35c; 4 lbs., \$1.00.

Lime Suiphur. Gal., 75c.

Nutonex. 4 lbs., 60c.

Paracide. Lb., 50c; 5 lbs., \$2.

Sealecide, in cans. Qt., 75c; gal, \$1.55.

Volck, Garden. 3½ ozs., 35c; pt., \$1; qt., \$1.50; gal., \$4; 5 gal, \$12.50.

A New and Better Garden Glove

# National 🖠 Garden Gloves

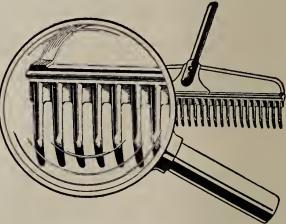

Made from special imported hides processed to render them cessed to render them amazingly soft and pliable. Permit almost barchand freedom, yet provide complete all-leather protection. Ideal for garden and similar uses.

DURABLE, and DIRTPROOF, DURABLE, and WASHABLE. Four sizes: "Smail" and "Medium" for women; "Medium" and "Large" for men. 75c a pair—2 pairs for \$1.40. This is the first time we have ever offered an all-leather Garden Glove with these special qualities at such a low price low price.

damaged parts, and after trimming trees. Qt., 50c; gal., \$1.50.

"Gumfinger" Lawn Rakes

An Ideal Gardening Tool

The teeth are live, resilient rubber, stiff enough to rake clean, but flexible enough not to tear or uproot the grass.

Rakes cleanly over rough surfaces. The rubber teeth adjust themselves to every irregularity in the ground.

Light and easily handled, its live springy action makes it ideal for the person who enjoys working in their garden and yard. There is no risk of injury if this rake is left with the prongs turned upright. upright.

'Gumfinger" Lawn Rakes are tough and resist wear. They can't rust or break. Guaranteed for three years. 16-in., \$1.00; 20-in., \$1.25; 24-in., \$1.50.

#### Stim-U-Plant

Stim-U-Plant tablets are a concentrated plant-food for shrubs, roses, and vegetables. Gets marvelous results; easy to apply. Small packages, 25c; 100 tablets, 75c; 1000 tablets in bucket, \$3.50. Full directions.

## SPRAYING GUIDE

FOR PEACHES	s, PLUMS, NECTARINES,	AND APRICOTS	FOR CHERRIES—Continued		
Time of Application	Spray Material	Enemy	Time of Application		
I. Dormant spray. In late fall or early spring 3 to 4 weeks before buds begin to swell.	Scalecide 1 gal. to 15 gals. water, or Lime-Sulphur Solution 1 gal. to 8 gals. water. If troubled with shothole fungus; substitute Bordeaux mixture 6 lbs. to 50 gals. water. If both scale and disease appear use both sprays separately.	Scale insects.  Leaf-curl.  Brown rot.  Shot-hole fungus.  General sanitation.	5. When the fruit is beginning to color.	Nutonex Sulphur 2½ lbs. to 50 gals. water. Where cherry maggots are present, use 2½ lbs. of Arsenate of Lead to 50 gals. water. Add 3 lbs. of fresh Hydrated Lime.  FOR GRAPES	Brown rot. Leaf-blight. Maggot.
2. When trees are	Nutonex Sulphur 21/2 lbs. to	Scab and brown		Arsenate of Lead 3 lbs. to 50	Grape-vine flea-

Ligustrum in Variety	
Nandina Domestica	
Coniferous Evergreens	
Junipers in Variety	_23, 24
Junipers in Variety Thujas in Variety	_23, 24

FRUITLAND NURSERIES grows a variety of plant material second to none, but certain plants, owing to soil, climate, and our ability in knowing how to grow, we consider better than can be had elsewhere.

### NATIVE PLANT MATERIAL from FRUITLAND NURSERIES

The Southeastern States are rich in beautiful and satisfactory, native deciduous, broad-leaved and coniferous shrubs and trees. There is a close affinity between this portion of the United States and China, where so many of our rare plants come from. Collected plants from the wild are, at the best, a waste of the average planter's time, and a depopulation of the natural beauty of the forest.

FRUITLAND NURSERIES has quite a collection of nursery-grown native plant material. This is not to be confused with inferior collected stock. Descriptions and prices of these plants will be found on pages listed.
